

- Q.25 What are the advantages of shuttle less loom?
- Q.26 Write principle of weft insertion in projectile weaving.
- Q.27 Differentiate single rapier and double rapier.
- Q.28 Write down the applications of air jet loom.
- Q.29 Write down the important parts of water jet loom.
- Q.30 Write a short note on tuck in selvedge.
- Q.31 Write a short note on terry weaving.
- Q.32 Mention the factors which improve the efficiency of a loom.
- Q.33 Write a short note on drawing-in.
- Q.34 Define efficiency of a loom and give its formula.
- Q.35 Mention different types of fabric defects occurring due to warp along with their causes.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Describe the construction detail and working electrical warp stop motion with diagram.
- Q.37 Give classification of rapier weft insertion method with diagram.
- Q.38 Describe the method of formation of leno selvedge and tuck in selvedge.

No. of Printed Pages : 4 182753/122753/032753
Roll No.

5th Sem / Text. Tech. Subject:- Weaving Technology - III

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What is the primary purpose of a shuttle in weaving?
- To hold the weft yarn
 - To control tension in the warp yarn
 - To form a shed
 - To beat the weft yarn into place
- Q.2 The breaking of a warp end is detected by:
- Healds
 - Reed
 - Drop Pin
 - Warp Beam
- Q.3 The process of dividing the warp sheet in two parts is called:
- Shedding
 - Picking
 - Beating
 - Drawing-in
- Q.4 The part which avoids width wise contraction of fabric on loom, is known as :
- Drop Pin
 - Reed
 - Feeler
 - Temple

Q.5 The speed of shuttle looms is generally _____ than shuttle less loom:

- a) Lower b) Equal
- c) Higher d) None of these

Q.6 Multiple grippers are used in:

- a) Rapier Loom b) Water Jet Loom
- c) Air Jet Loom d) Projectile Loom

Q.7 The highest noise pollution is observed in:

- a) Air Jet Loom b) Water Jet Loom
- c) Shuttle Loom d) Rapier Loom

Q.8 In thermoplastic fabrics, which type of selvedge is preferred?

- a) Leno Selvedge
- b) Chain stitch Selvedge
- c) Tucked in Selvedge
- d) Fused Selvedge

Q.9 How many warp beams are used in a terry loom?

- a) 1 b) 3
- c) 2 d) 4

Q.10 "Half Pick" is a type of:

- a) Temple b) Feeler
- c) Warp stop motion d) Fabric defect

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Give object of warp stop motion.

Q.12 Name two types of temples.

Q.13 Name two types of automatic loom.

Q.14 Name the process which comes after gaiting-up of beam.

Q.15 What is the speed (picks per Minute) of rapier loom?

Q.16 Which selvedge is formed in air jet loom?

Q.17 Name two fabric defects due to weft.

Q.18 Mention uses of terry fabrics.

Q.19 Which process comes after winding.

Q.20 Expand PPM and PPI.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Name important parts of mechanical warp stop motion.

Q.22 Name important parts of automatic pirn change mechanism.

Q.23 Write a short note on roller type temple.

Q.24 Describe the function of weft feeler.
