

- Q.5 Which one is not a diagnostic equipment:
 a) MRI b) X ray
 c) Ventilator d) USB
- Q.6 Which one of these have electromagnetic properties.
 a) Infrared rays b) X ray
 c) Gamma rays d) All
- Q.7 What type of radiation is used in CT scans?
 a) Gamma b) X-rays
 c) Ultraviolet d) infrared
- Q.8 Image intensifiers convert low energy x-radiation into visible light images in
 a) USG b) X rays
 c) MRI d) Monitors
- Q.9 Gantry is a part of
 a) X ray b) USG
 c) Monitors d) CT
- Q.10 Rotating anode type X ray tube is used in
 a) CT b) Ventilator
 c) MRI d) USG

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write one use of MRI.

(2)

183253

- Q.12 Write one biological effect of USG
- Q.13 In which diagnostic equipment filament circuit is used.
- Q.14 Write one difference between stationary anode and rotating anode type X ray tube.
- Q.15 Write name of one component of gamma camera.
- Q.16 Sound waves are used in _____.
- Q.17 _____ is a radioactive particle.
- Q.18 X-ray is emitted by the acceleration of _____.
- Q.19 Write full form of MIT.
- Q.20 Write the name of the machine in which magnetic field is used for imaging.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write five system components of CT.
- Q.22 Write a short note on Larmer frequency.
- Q.23 Explain the safety issues in the X-rays in a short note.
- Q.24 Explain the angiography procedure in a short note.
- Q.25 Explain the working principle of MRI in short note.
- Q.26 Write five system components of CT.
- Q.27 Write a short note on the B mode of USG.
- Q.28 Explain 1st generation of CT in a short note.
