

- Q.26 What are microwave diathermy. Explain the production of microwave.
- Q.27 Explain coherence and directionally characteristic of laser.
- Q.28 Explain main elements of LASER in brief
- Q.29 Explain Capacitive method application of short wave diathermy.
- Q.30 What are CSSD. Explain the layout of CSSD in hospital.
- Q.31 What the stimulator. Explain the spinal cord stimulator.
- Q.32 What are Autoclave. Explain working principle of Autoclave.
- Q.33 Explain inductive method application of short wave diathermy.
- Q.34 Explain Ultrasonic therapy unit.
- Q.35 What are Laser. Explain Characteristic of Laser.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 What are Microwave Diathermy. Explain the production of microwave with block circuit diagram.
- Q.37 What are Electro therapy. Draw diagram of different waveform.
- Q.38 What are laser. Explain working principle and application.

No. of Printed Pages : 4

183255

Roll No.

5th Sem / Medical Electronics Sub : Therapeutic Medical Instrumentation (TMI)

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Ruby Laser, The colour of laser light is due to _____ an atom
- a) Oxygen b) Aluminium
- c) Xenon d) Chromium
- Q.2 What is a Disadvantage of LED light over LASER light.
- a) Non Coherence light source
- b) Hardly Available
- c) Consuming more power
- d) Costlier than Laser
- Q.3 What is the composition of the membrane that are used in dialysis
- a) Chitin b) Polyethylene
- c) Poly vinyl chloride d) Cellulose

- Q.4 What property of sound wave act like principle of ultrasound
- Reflection & Refraction
 - Reflection
 - Refraction
 - Propagation
- Q.5 The substance cannot pass through semi permeable wall of glomerulus.
- Globin
 - Albumin
 - Blood cells
 - All of these
- Q.6 Where is hemodialysis carried out.
- Home
 - Hospital
 - Dialysis Centre & Hospital
 - Dialysis Centre
- Q.7 How many times a week dialysis must be done.
- Every day
 - Once a week
 - Twice a week
 - Trice a week
- Q.8 For what all purposes is diathermy principle used?
- Surgical and Therapeutic
 - Therapeutic and Diagnostic
 - Diagnostic and surgical
 - Diagnostic and rehabilitative
- Q.9 Which can be side effect of hemodialysis
- Nausea
 - Weakness
 - Cramp
 - All of these

(2)

183255

- Q.10 What is the inner surface of autoclaves made of?
- Mild steel
 - Copper
 - Stainless steel
 - Aluminum

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Full form of SWD.
- Q.12 What is Autoclave.
- Q.13 What are Lower Energy State.
- Q.14 What s Cardiac Pacemaker.
- Q.15 Expand LASER.
- Q.16 One application of Laser in Industries.
- Q.17 Define Anesthesia.
- Q.18 What are cardiac Pacemaker.
- Q.19 Name instruments which are used in Surgical Diathermy.
- Q.20 Name two type of Laser.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain any two Therapeutic instruments which are used in operation theatre.
- Q.22 What are electrotherapy. Explain galvanic current wave form
- Q.23 What are laser. Explain its working principle.
- Q.24 Explain transcutaneous electric nerve stimulator.
- Q.25 What are Nephron. Draw diagram & Explain its physiological working.
