

SECTION-B

Note: Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

- Q.11 Explain the process of cooling of transformers.
- Q.12 Differentiate between step-up and step-down voltage transformer.
- Q.13 Give the starting method of DC motor in brief.
- Q.14 Explain any four common faults in single-phase D.C. motors.
- Q.15 Describe the working of three phase induction motor.
- Q.16 Write short note on speed reversal of A.C. motors.
- Q.17 Write various techniques of soldering. Explain any one.
- Q.18 Explain any three methods used for testing of A.C. motors.

SECTION-C

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

- Q.19 Explain the principles and working of D.C. motor series type in detail.
- Q.20 Explain the principle of operation and construction detail of a single-phase transformer.

SECTION-A

Note: Very Short answer type questions. All questions are compulsory (10x1=10)

- Q.1 Define Step down transformer.
- Q.2 What is Soldering?
- Q.3 Tell any two methods used for testing of D.C. motor.
- Q.4 Define Horse Power. Write its unit.
- Q.5 What is rewinding of transformers?
- Q.6 What is auto transformer?
- Q.7 What do you understand by Repulsion Start?
- Q.8 Write two applications of step-down voltage transformer.
- Q.9 Write any two common faults in A.C. motors.
- Q.10 Write two applications of step-up voltage transforms.
