

Q.17 If a room has a sensible heat load of 30,000 kJ/hr and a latent heat load of 20,000 kJ/hr, then calculate Sensible Heat factor.

Q.18 Explain the difference between absolute and relative humidity with example.

SECTION-D

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

Q.19 Explain various types of heat loads to be estimated as in Air Conditioning.

Q.20 Write short note on

- a) Thermostat
- b) By pass factor

1st Sem/ DVOC (Ref. & Air Cond.) Subject : Basics of Air Conditioning

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Multiple choice questions. All questions are compulsory (5x1=5)

Q.1 Types of Air Conditioning are :

- a) Comfort Air Conditioning
- b) Industrial Air Conditioning
- c) Both 'a' and 'b'
- d) None

Q.2 What is ideal room temperature for human body _____ degree celsius

- a) 30
- b) 37
- c) 25
- d) 37 degree Farenheit

(1)

188452

- Q.3 The window Air Conditioner is mounted on
- a) Wall b) Ceiling
 - c) Window d) Both 'a' and 'c'

- Q.4 In split Air conditioner, Indoor unit has
- a) Compressor and condenser
 - b) Evaporator
 - c) Capillary tube
 - d) All of the above

- Q.5 Latest technology used in air conditioners in
- a) Automatic power cut b) Inverter technology
 - c) Refrigerator autofill d) All season running

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

- Q.6 At _____ temperature the water vapour starts converting into water droplets.

(2)

188452

- Q.7 The law governing partial pressure is _____ law.

- Q.8 Star rating is provided out of _____ starts.

- Q.9 One ton of refrigeration is equal to _____ KJ/min.

- Q.10 Compressor is used in AC for increasing the pressure of _____.

SECTION-C

Note: Very Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

- Q.11 Explain any method commonly used for performance rating of A.C.

- Q.12 Write the main components included in outdoor unit of split AC and describe them briefly.

- Q.13 Describe any five applications of Air conditioning.

- Q.14 Write short note on inverter technology AC.

- Q.15 Differentiate between wet bulb depression and dew point depression.

- Q.16 Write short note on calculation of enthalpy of moist air.
