

SECTION-D

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

Q.19 What is multi-speaker system? Why it needed? Write its different components.

Q.20 Draw & explain block diagram of Disc recording system.

No. of Printed Pages : 4

188531

Roll No.

**Level-4, 1st Sem/DVOC

Subject : Trouble Shooting &
Maintenance of Electronic Equipment-I**

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Multiple choice questions. All questions are compulsory (5x1=5)

Q.1 The primary function of a woofer is to reproduce:

- a) High frequencies
- b) Mid-Range frequencies
- c) Low frequencies
- d) All frequencies

Q.2 The moving coil loud speaker works on the principle of:

- a) Electrostatic force
- b) Electromagnetic induction
- c) Capacitive variation
- d) Piezoelectricity

Q.3 What does the 'impedance' of a loudspeaker affect?

- a) Power output only
- b) Volume only
- c) Matching with amplifier
- d) Sound quality only

Q.4 One disadvantage of optical recording in CDs is :

- a) Susceptibility to scratches and dirt
- b) Low fidelity
- c) High mechanical wear
- d) Incompatibility with amplifiers

Q.5 Which microphone is sensitive to both frequency and humidity?

- a) Moving coil b) Capacitor
- c) Carbon d) Piezoelectric

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

Q.6 In optical recording, information is stored as _____ and _____ on the disc surface.

Q.7 In a moving coil microphone, the _____ and _____ are the two moving parts.

Q.8 Recording on CD is performed using laser beams in optical recording. (True / False)

Q.9 A _____ microphone uses carbon granules to convert sound into electrical signals.

Q.10 The loudness of sound is measured in _____.

SECTION-C

Note: Very Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

Q.11 Explain in brief the working principle of capacitance microphone.

Q.12 What is Piezo-electric effect? Discuss the principle of piezoelectric microphone.

Q.13 Outline the frequency characteristics of practical loudspeakers.

Q.14 What are common faults associated with CD player. How noise is minimized in recording of CD.

Q.15 Outline the differentiating features between Woofer and Tweeter.

Q.16 What is importance of impedance & power level in loud speakers?

Q.17 What are advantages & disadvantages of optical recording?

Q.18 How does working of moving coil microphone differ from carbon microphone?
