

SECTION-B

Note: Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

- Q.11 Define PCB. Explain in brief different types of PCB.
- Q.12 Write the steps to check for cold continuity of PCB.
- Q.13 Draw the diagram of good solder joint and write its characteristics.
- Q.14 Differentiate between soldering and de-soldering.
- Q.15 Write the safety precautions during the SMD soldering and de-soldering.
- Q.16 What are crimping tools? What are its types? How they are used?
- Q.17 Describe the process of de-soldering using Pump and Wick.
- Q.18 Define tinning and explain its methods.

SECTION-C

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

- Q.19 Define Soldering. Write the applications of soldering. Describe the steps involved in soldering process.
- Q.20 Write short notes on :
 - a) Preparing component for soldering
 - b) SMD components

No. of Printed Pages : 4

188554

Roll No.

1st Sem / DVOC Level-5 (Medical Image Tech.)

Subject : Soldering & De-Soldering Components-1

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Very Short answer type questions. All questions are compulsory (10x1=10)

- Q.1 What is PCB track?
- Q.2 Define soldering gun.
- Q.3 In SMD IC packages, the full form of DIP is _____.
- Q.4 Approximately how many numbers of gates are incorporated in SSI?
- Q.5 The number "105" on the body of a chip resistor show its resistance value equal to _____?
- Q.6 What is loose solder?
- Q.7 A description of the _____ system to be used to notify employees to evacuate and / or take other actions.
- Q.8 Write the prime use of flux is soldering.
- Q.9 What is the strongest type of solder?
- Q.10 Name any two medical services required in PCB soldering section.
