

Roll No.

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

Q.19 Explain Multi-dimensional array. Write a small program to read a 3x2 matrix by that array.

Q.20 Write a program to calculate the factorial of a number "n".

Level-5, 1st Sem/ DVOC (Software Development)
Subject : Programming in C

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Multiple choice questions. All questions are compulsory (5x1=5)

Q.1 Which character is used to indicate the end of statement in C language?

- a) , b) ;
c) : d) .

Q.2 Which operator is used for "Logical AND" in C

- a) `&&` b) `&`
c) `:` d) `::`

Q.3 In C which type of variable should be used to store decimal number in C

- a) Int b) Char
c) double d) Float

Q.4 The keyword 'break' cannot be simple used within

- a) Do-while b) For
- c) If-Else d) While

Q.5 The purpose of using scan f () function in C is ____.

- a) To print formatted output
- b) To read formatted input
- c) To scan the functioned memory
- d) To allocate a memory

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

Q.6 Name any two arithmetic operators.

Q.7 C is a ____ (high / middle / lower) level language.

Q.8 The decrement operator is _____.

Q.9 An _____ is a sequential collection of variables.

Q.10 Difference of operator and operand is _____.

SECTION-C

Note: Very Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

Q.11 Define function. How function is called. Also write down types of function.

Q.12 Explain two storage classes.

Q.13 Discuss the purpose of the do-while statement with an example.

Q.14 Show the difference between Do while loop and for loop by writing program for generating even numbers upto 10 .

Q.15 Differentiate between Union and Structure.

Q.16 Write down he methods of passing arguments to functions.

Q.17 Write down advantages of pointers.

Q.18 Write and explain the functions of reading and writing to a file.
