

No. of Printed Pages : 4
Roll No.

189061

Level-5, 2nd Sem/ DVOC (Software Development)
Subject : Concepts of Data Mining

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Multiple choice questions. All questions are compulsory (5x1=5)

- Q.1 Which is not data mining function?
- a) Classification b) Clustering
 - c) Class description d) Object description
- Q.2 Which is most effective statistical measure of centre of symmetrical data set
- a) Mode b) Mid-Range
 - c) Mean d) Median
- Q.3 Data smoothing can be done by _____ technique.
- a) Data Mining b) Data Validation
 - c) Regression d) All of the above
- Q.4 The process of removing deficiencies and loop holes in data is called
- a) Data aggregate b) Cleaning of data
 - c) Extraction of data d) Compaction

- Q.5 What do data warehouses support
- a) OLAP
 - b) OLTP
 - c) OLTP and OLAP
 - d) Operational databases

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

- Q.6 Name two grid based clustering methods.
- Q.7 Expand DHP_____.
- Q.8 Data structure in data warehouse contains the time element? (True / False)
- Q.9 Decision trees are used for_____.
- Q.10 Name any one issue of system categorization.

SECTION-C

Note: Very Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

- Q.11 Differentiate between MOLAP and ROLAP.
- Q.12 Explain the technique of increasing efficiency of Apriori algorithm.
- Q.13 Write short note on Naive Bayes classification.

- Q.14 Discuss different data cleaning approaches.
- Q.15 Explain FP-Growth algorithm.
- Q.16 Explain hierarchical method of cluster analysis.
- Q.17 What are the differences between data warehousing and data mining. Explain.
- Q.18 Explain Split algorithm based on Gini Index.

SECTION-D

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

- Q.19 Explain data cube implementation and data cube operations.
- Q.20 A data set for statistical analysis includes only one attribute "X"

$x = \{7, 12, 5, 8, 5, 9, 13, 12, 19, 7, 12, 12, 13, 3, 4, 5, 13, 8, 7, 6\}$

What is median of the data?

Calculate

- a) Statistical Mean
- b) Standard deviation
