

SECTION-D

No. of Printed Pages : 4
Roll No.

189062

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

Q.19 What is searching. Explain the various searching methods in details.

Q.20 Write the various operations associated with linked list.

DVOC (Level-5) 2nd Sem / Software Development Subject : Data Structure

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Multiple choice questions. All questions are compulsory (5x1=5)

Q.1 What is another name for the circular queue among the following options?

- a) Square buffer b) Rectangle buffer
- c) Ring buffer d) None of the above

Q.2 The necessary condition to be checked before deletion from the Queue is _____

- a) Overflow b) Underflow
- c) Rear value d) Front value

- Q.3 In a binary tree, every node has exactly two children.
(True / False)
- Q.4 Items are inserted at the top of stack. (True / False)
- Q.5 A data structure is a logical method of representing data in memory. (True / False)

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

- Q.6 FIFO stands for ____.
- Q.7 Define algorithm.
- Q.8 Define PUSH and POP.
- Q.9 What is data type.
- Q.10 Define Stack.

SECTION-C

Note: Very Short answer type questions. Attempt any six questions out of eight questions. (6x5=30)

- Q.11 What are the difference between stack and queue?
- Q.12 Explain the binary search with an example.
- Q.13 Explain in brief about depth first traversal of a graph.
- Q.14 Explain quick sort in brief.
- Q.15 What are the applications of linked list?
- Q.16 What are the advantage of flowchart?
- Q.17 Explain working of circular queue is short.
- Q.18 What are the rear and front pointers of queue. How pointers changes when we delete an element.
