

- Q.20 What are the different types of impellers used in centrifugal pump? (CO4)
- Q.21 What is duty and discuss different methods of improving duty. (CO3)
- Q.22 Describe hydraulic conductivity and storage coefficient. (CO5)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the operation and maintenance of Centrifugal pump, their common troubles with remedies. (CO4)
- Q.24 Give the classification of canals, Discuss the advantages and disadvantages of canal lining. (CO6)
- Q.25 Describe the basic details, characteristics, Layout and adaptability of Sprinkler irrigation system. (CO2)

3rd Sem / Agriculture

Subject : Farm Irrigation Engineering/ Farm Irrigation Engineering/ Water Res. Engg./ Irrigation Technology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 The rate at which water infiltrates into the soil. (CO3)
- a) Infiltration rate b) Irrigation Frequency
c) Gross irrigation d) Delta
- Q.2 The difference between static water level and pumping water level. (CO4)
- a) Area of influence b) Drawdown
c) Well yield d) None of the above
- Q.3 Irrigation canal are generally aligned along: (CO5)
- a) Contour line b) Watershed line
c) Straight line d) Valley line

(1) 220131/180132/120132
/030132/030154

Q.4 Which is the method to improve the duty of water?
(CO3)

- a) Lining of canal
- b) Construction of weirs
- c) Construction of dams
- d) Check dams

Q.5 The irrigation method that resembles like rain.
(CO2)

- a) Sprinkler b) Drip
- c) Shallow d) Rotary

Q.6 Which of the following pump is classified based on the type of service?
(CO4)

- a) Displacement pump
- b) Centrifugal pump
- c) Deep well pump
- d) Electric driven pump

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory.
(6x1=6)

Q.7 Water is present under pressure in confined aquifer(True/False)
(CO3)

Q.8 impeller is a part of _____.
(CO4)

Q.9 Chute spillways are used at _____slop.
(CO6)

Q.10 Centrifugal pumps are positive displacement pump(True/False)
(CO4)

Q.11 Define Delta.
(CO3)

Q.12 State two demerits of over irrigation.
(CO1)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions.
(8x4=32)

Q.13 Explain different surface irrigation methods.
(CO2)

Q.14 Describe the factor affecting the consumptive use of water.
(CO3)

Q.15 Give classification of pumps.
(CO4)

Q.16 Differentiate between confined and unconfined aquifers.
(CO5)

Q.17 Describe the constructional detail of diffuser type centrifugal pump.
(CO4)

Q.18 What are the various quality parameters for irrigation water and their importance.
(CO1)

Q.19 Explain pollution associated with poor quality of irrigation water.
(CO6)
