

- Q.20 How temperature and moisture will changes during the storage of cereals crops. (CO4)
- Q.21 Differentiate between thermal conductivity and thermal diffusivity of agricultural products. (CO2)
- Q.22 Explain the cool-chain for handling, storage and marketing of fruits and vegetables. (CO5)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 What do you understand by moisture content? Explain the different direct methods used for determination of moisture content in agriculture products. (CO1)
- Q.24 Define packaging and explain the different types of packaging used for fruits and vegetables in details. (CO5)
- Q.25 Explain the any two modern storage structures. Also discuss their management. (CO4)

Roll No.

3rd Sem / Agriculture

Subject : Post-Harvest Technology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which of the following factor affects the fruits during transportation? (CO5)
- a) Temperature b) Moisture content
- c) Pressure d) All of these
- Q.2 Screw conveyor is generally used to move grains horizontal but it can also be used upto an angle of (CO4)
- a) 30° b) 45°
- c) 90° d) None of these
- Q.3 The level of post-harvest loss in perishable is about: (CO1)
- a) 10-15% b) 20-25%
- c) 25-33% d) 35-40%

(1)

220134

- Q.4 Deep bed drying is characterized by: (CO3)
- Ambient temperature drying
 - Heterogeneous drying
 - Homogeneous drying
 - Uniform drying rate
- Q.5 Why do agricultural produce undergo from postharvest handling? (CO5)
- Avoid moisture loss
 - Increase moisture loss
 - Increase field heat
 - Increase field heat and moisture loss
- Q.6 The removal of foreign and undesirable materials from the desired grain product is called: (CO1)
- Grading
 - Sorting
 - Milling
 - Cleaning

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Define grading. (CO1)
- Q.8 During harvesting faulty tools_____ the quantity of fresh produce. (CO5)

(2)

220134

- Q.9 When temperature decreases and RH of air increases, the grain will_____ the moisture content. (CO4)
- Q.10 What do you understand by scalping? (CO1)
- Q.11 Enlist physical properties of agricultural produce. (CO2)
- Q.12 Density = Mass per unit_____ (Co2)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the need and scope of post-harvest technology. (CO1)
- Q.14 Explain the different factors affecting the drying of cereals and pulses crops. (CO3)
- Q.15 Write a note on conduction and convection drying. (CO3)
- Q.16 Discuss about different frictional properties of agricultural products. (CO2)
- Q.17 Explain the working principle of screw conveyor with suitable diagrams. (CO4)
- Q.18 Write a short note on moisture content and equilibrium moisture content. (CO2)
- Q.19 Enlist different types of dryers. (CO3)
