

Q.21 What are the different types of machines used in seed processing? (CO1)

Q.22 Explain the process of different commercial seed treater. (CO1)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Describe the different by-products obtained during rice milling and their industrial uses. (CO2)

Q.24 Describe the complete wheat milling process, Include key steps such as cleaning, grinding, and grading. (CO2)

Q.25 Explain the mechanical oil extraction process, describing the working principle of hydraulic press. (CO5)

No. of Printed Pages : 4

220142

Roll No.

4th Sem. / Agri Engg.

Subject : Agro Process Engineering

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Which method is NOT a traditional parboiling method for rice? (CO2)

- a) Single boiling b) Double boiling
- c) Pressure parboiling
- d) Continuous parboiling

Q.2 Which type of separator is used to remove dust and fine particles from seeds? (CO1)

- a) Air screen cleaner-cum-grader
- b) Disc separator
- c) Indented cylinder d) Spiral separator

Q.3 Which of the following is a modern parboiling method for rice processing? (CO1)

- a) Single boiling b) Double boiling
- c) CFTRI method d) Traditonal method

- Q.4 In wheat milling, what is the first step after receiving the wheat? (CO1)
- a) Cleaning b) Grinding
c) Grading d) Polishing
- Q.5 In pulse milling, which process is NOT involved? (CO4)
- a) Cleaning b) Conditioning
c) Fermentation d) Grading
- Q.6 Which device is used in oil mills for mechanical oil extraction? (CO5)
- a) Ghani b) Spiral separator
c) Magnetic separator
d) Electrostatic separator

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The process of removing hulls from paddy during rice milling is called _____. (CO2)
- Q.8 the equipment used to minimize rice breakage during milling is _____. (CO3)
- Q.9 The device used to separate heavier grains from lighter impurities in seed processing is called _____. (CO1)

- Q.10 In pulse milling, the two primary methods are _____ and _____. (CO3)
- Q.11 The process of strengthening wheat straw to increase its density is called _____. (CO2)
- Q.12 In rice milling, the device that polishes rice grains to improve appearance is called a _____. (CO2)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 What are the steps involved in the seed processing process? (CO1)
- Q.14 Describe the working mechanism of a pneumatic separator used in seed cleaning. (CO3)
- Q.15 Explain the double boiling method in rice parboiling. (CO2)
- Q.16 What are the different stages involved in wheat milling? (CO4)
- Q.17 Describe the layout and key components of an animal feed processing plant. (CO6)
- Q.18 Explain the process of solvent extraction in oil mills. (CO5)
- Q.19 Describe the steps involved in pulse milling. (CO3)
- Q.20 What is the principles of acid delinting in cotton seed processing (CO1)
