

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Describe the process of sand casting in detail, including the preparation of patterns, moulds, and cores. What are the advantages and limitations of sand casting? (CO3)
- Q.24 Describe the working of a drilling machine and explain the different types of drilling machines used in industry. (CO4)
- Q.25 Discuss the principles of arc welding. Describe the types of arc welding processes and the common welding defects with their remedies. (CO5)

No. of Printed Pages : 4

220143

Roll No.

4th Sem. / Agriculture Engineering

Subject : Manufacturing Technology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which instrument is used for measuring the internal diameter of a hole? (CO1)
- a) Micrometer b) Vernier calliper
c) Thread gauge d) Depth gauge
- Q.2 Which is not a pattern material? (CO2)
- a) Wood b) Metal
c) Glass d) Plaster
- Q.3 A lathe machine is used for: (CO4)
- a) Drilling b) Turning operations
c) Milling d) Broaching
- Q.4 The two types of boring machines are: (CO4)
- a) Horizontal and Vertical
b) Cylindrical and Spherical
c) Capstan and turret d) Radial and Bench

Q.5 Lapping is used for: (CO2)

- a) Coarse cutting b) Fine finishing
- c) Joining metals d) Casting

Q.6 1. Arc welding uses: (CO5)

- a) Only gas b) Electricity
- c) Oil d) Water

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 A _____ is used to check the height of a component. (CO1)

Q.8 _____ is the process of preserving patterns for future use. (CO3)

Q.9 The process of cutting grooves on the surface of a job on a lathe is called _____. (CO4)

Q.10 The process of making a hole larger in diameter is called _____. (CO1)

Q.11 _____ operation is used after grinding for a fine finish. (CO2)

Q.12 The selection of abrasive depends on the _____ to be finished. (CO4)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 What are the differences between spot welding and seam welding? (CO5)

Q.14 What is the principle of arc welding? (CO5)

Q.15 Differentiate between gas welding and arc welding. (CO5)

Q.16 Define the terms: limits, fits, and tolerances with examples. (CO5)

Q.17 Write the difference between plain turning and taper turning. (CO4)

Q.18 Explain the types of patterns and materials used in pattern making. (CO3)

Q.19 Distinguish between cope and drag in moulding. (CO3)

Q.20 Write two safety precautions during grinding operations. (CO4)

Q.21 Describe cutting speed, feed, and depth of cut in drilling operations. (CO4)

Q.22 What are the applications of boring in machine operations? (CO4)
