

Q.22 What factors affects biogas production? (CO2)

Q.25 Explain how wind energy is converted into electricity and its significance in India. (CO3)

b) Solar to mechanical

- c) Mechanical to electrical
- d) Thermal to electrical

Q.4 Which type of biogas plant has a floating gas holder?
(CO2)

- a) Fixed Dome type
- b) Deenbandhu biogas plant
- c) Floating gas holding type
- d) Batch type

Q.5 Which of the following is a component of a tidal power plant?
(CO4)

- a) Solar collector b) Wind turbine
- c) Barrage d) Geothermal well

Q.6 Which of the following is a geothermal resource ?
(CO4)

- a) Wind b) Hot Springs
- c) Solar radiation d) Tides

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory.
(6x1=6)

Q.7 The physical principle of solar energy conversion is based on the transformation of _____ into heat.
(CO1)

Q.8 A major limitation of solar energy is its dependence on _____.
(CO1)

Q.9 Wind energy is widely used in the _____.
(CO3)

Q.10 In India, the development of wind energy is influenced by _____.
(CO1)

Q.11 Tidal power plants can be classified into _____ and _____.
(CO4)

Q.12 The main components of a tidal power plant include _____ and _____.
(CO4)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions.
(8x4=32)

Q.13 Differentiate between renewable and non-renewable energy sources with example.
(CO1)

Q.14 What are the advantages and limitations of renewable energy sources?
(CO1)

Q.15 Describe the different types of biogas plants.
(CO2)

Q.16 What are the advantages and disadvantages of wind energy?
(CO3)

Q.17 Discuss the role of biomass energy in farm residue management.
(CO2)

Q.18 What is biomass gasification?
(CO5)
