

Q.22 Write down applications of drone in precision farming. (CO2)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 What is the precision Farming, and also describe its advantages, tools and equipment? (CO1)

Q.24 Explain GIS system, its principle and components. (CO2)

Q.25 Describe remote sensing, its working and applications. (CO4)

5th Sem / Agriculture

Subject : Precision Agriculture

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 _____ is used to operationalize precision farming at the farm level. (CO1)

- a) Variable rate applicator
- b) Variable rate technology
- c) Variable rate application
- d) None of the above

Q.2 The navigation system based on a network of satellites that helps users to record positional information (CO2)

- a) GPS
- b) GIS
- c) Remote Sensing
- d) All of these

Q.3 Band Selection is one of the important steps in _____. (CO4)

- a) Remote sensing
- b) Hydrospectral data

(1)

220156

- c) Hyper spectral remote sensing
 d) All the above
- Q.4 The collection of information related to object without being physical contact with them is called as _____. (CO4)
- a) Precision agriculture
 b) GPS
 c) Yield monitoring
 d) Remote sensing
- Q.5 GIS stands for _____. (CO2)
- a) Geographic Information Service
 b) Geographic Information System
 c) Geopositioning Information System
 d) Geopositioning Information Services
- Q.6 The required fertilizer N is distributed in several applications during the crop growing season using tool like the _____. (CO5)
- a) Specific leaf area b) Leaf colour chart
 c) Leaf area index d) None of these

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Which kind of data GIS deals? (CO2)

(2) 220156

- Q.8 AI & ML stands for _____. (CO5)
- Q.9 Write full form of VRT. (CO2)
- Q.10 Write components of GIS. (CO2)
- Q.11 Yield monitoring. (CO4)
- Q.12 Write steps of precision farming. (CO1)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Write down the scope and adoption of precision agriculture in India. (CO1)
- Q.14 Describe the working of GPS system. (CO2)
- Q.15 What are the limitations of precision agriculture in India? (CO1)
- Q.16 Write down applications of remote sensing in precision farming. (CO4)
- Q.17 How grid sampling is used in precision farming? (CO3)
- Q.18 Write down names of remote sensing resolutions. (CO4)
- Q.19 Describe the micro irrigation system used in precision agriculture. (CO5)
- Q.20 Explain the IOT in precision agriculture. (CO5)
- Q.21 What do you understand by VRT? (CO3)
