

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 a) Explain compass surveying in detail.
- b) Define fore bearing and back bearing and solve suitable numerical.
- Q.24 a) Explain levelling procedure and reduction of levels by rise and fall method with example.
- b) Write advantages and disadvantages of auto level.
- Q.25 a) Describe plane table surveying methods: radiation, intersection & resection
- b) Explain modern digital surveying instruments such as total station and EDM.

No. of Printed Pages : 4
Roll No.

220222

2nd Sem. / Arch. Asstt.

Subject : Surveying

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 The main principle of surveying is
- a) Random measurement
 - b) Working from part to whole
 - c) Working from whole to part
 - d) Guess work
- Q.2 The instrument using for measuring magnetic bearing is
- a) Level
 - b) Compass
 - c) Theodolite
 - d) Plane table
- Q.3 The line joining points of equal elevation is called
- a) Contour
 - b) Meridian
 - c) Traverse
 - d) Datum

- Q.4 In leveling, BS stands for
a) Back station b) Back sight
c) Bench sight d) Base sight
- Q.5 The process of turning the plane table correctly with reference to north is
a) Centering b) Levelling
c) Orientation d) Traversing
- Q.6 Total station mainly measures.
a) Area b) Angle only
c) Distance only d) Distance and angle

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The angle between the magnetic meridian and true meridian is called _____.
- Q.8 A permanent reference point of known RL is called _____.
- Q.9 The temporary adjustment of a dumpy level includes _____, _____ and _____.

- Q.10 Magnetic declination is the angle between _____ and _____ meridian.
- Q.11 The staff reading taken after shifting the instrument is called _____ sight.
- Q.12 EDM stands for _____.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Define surveying and state its objectives.
- Q.14 Explain the principles of surveying.
- Q.15 Describe prismatic compass with neat sketch.
- Q.16 Differentiate between WCB and RB with example.
- Q.17 Define magnetic dip and declination.
- Q.18 Write causes and corrections of local attraction.
- Q.19 Explain temporary adjustments of dumpy level.
- Q.20 Describe height of collimation method.
- Q.21 Explain plane table equipment and their uses.
- Q.22 Write short notes on GPS and GIS systems.
