

- Q.17 Describe the preparation method of lime cement mortar and their uses.
- Q.18 Describe in brief about the compaction and curing of concrete.
- Q.19 Explain various defects in timber.
- Q.20 Write various methods of seasoning of timber.
- Q.21 Write the classification of Glass.
- Q.22 Explain the properties of concrete M15.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain with sketches different types of Handles used in doors & windows.
- Q.24 Write the name of the different types of glasses and explain their properties.
- Q.25 Draw the sketch of a panel door with dimensions in plan & elevation.

No. of Printed Pages : 4
Roll No.

3rd Sem / Architectural Assistantship

Subject : Building Materials & Construction - II

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 In a mortar mix, the primary function of aggregates is to ;
- a) Provide strength
 - b) Act as a binding material
 - c) Improve workability and volume
 - d) Enhance water retention
- Q.2 Which of the following is an common application for lime mortar?
- a) Structural beams
 - b) Concrete foundations
 - c) Interior plastering

- Q.3 Which of the primary binding material in a typical mortar mix?
- a) Aggregate b) Cement
c) Water d) Sand
- Q.4 Which of the following factors is most important when selecting aggregates for a mortar mix?
- a) Color
b) Particle size distribution
c) Compressive strength
d) Density
- Q.5 Which test is commonly used to measure the workability of fresh concrete?
- a) Compressive strength test
b) Slump test
c) Tensile strength test
d) split tensile test
- Q.6 Retarders are used in concrete where
- a) Concreting takes place under very cold conditions
b) Concreting takes place under humid conditions
c) Concreting takes place under very hot conditions
d) Concreting takes place under fog conditions

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 What is the primary chemical compound that constitutes the majority of lime, a key ingredient in cement?
- Q.8 What is the requirement of water percentage in the process of hydration of OPC to complete all the chemical reaction?
- Q.9 Write down the classification of building materials.
- Q.10 Write the name of the building material which have high seismic resistance and flexibility of nailed joints.
- Q.11 Which defects occur in the seasoning process of wood?
- Q.12 Write the examples of hardwood and softwood?

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Explain the composition of Portland cement.
- Q.14 Write down the classification of lime.
- Q.15 Write down the types and uses of Coarse Aggregates.
- Q.16 What are the different functions of mortar?
