

- Q.5 The modulus of elasticity is expected to have least value for
- | | |
|-------------|-----------|
| a) Glass | b) Copper |
| c) Aluminum | d) Wood |
- Q.6 A beam extending beyond the supports is called_____.
- | | |
|---------------------|--------------------|
| a) Overhanging beam | b) Cantilever beam |
| c) Fixed beam | d) Continuous beam |

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 _____ forces are those which act at a single point.
- Q.8 Co-planer forces lie in _____ plane.
- Q.9 The reaction on a roller support is at _____ to the roller base.
- Q.10 Every body has _____ centre of gravity.
- Q.11 One Pascal (Pa) = _____.
- Q.12 The negative bending moment is also called _____.

SECTION-C

- Q.13 State the effects of a force on a body.
- Q.14 State Parallelogram law of forces with neat sketch.
- Q.15 Define Moment of inertia and state its units.
