

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the functions of major assemblies of tractor in detail.
- Q.24 Explain principle and Functions of hydraulic system and explain various components of hydraulic system with figure.
- Q.25 Explain periodic maintenance procedure of tractor, faults diagnosis, rectification and replacement policies.

No. of Printed Pages : 4

Roll No.

6th Sem/ Automobile

Subject : Tractor & Special Purpose Vehicles

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 In tractor engine the complete path of power from the engine to the wheel is called
- a) Power train b) Power wheel
- c) Power cycle d) None of these
- Q.2 Shortening of top link of tractor three point hitch system
- a) Increases weight transfer on rear wheels
- b) Decreases weight transfer on rear wheels
- c) Increases penetration of implement
- d) Decreases penetration of implement
- Q.3 Differential lock in tractor is used to improve
- a) Lateral stability b) Braking performance
- c) Hydraulic lift d) Traction of a wheel

- Q.4 Which of the following is a device used on a tractor or stationary engine for maintaining nearly constant engine speed under varying loads?
- a) Volatility of fuel b) Governor
c) Pre-ignition d) Carburettor
- Q.5 Tractor engine oil should be changed and all grease point should be lubricated after every _____ working hrs.
- a) 15 b) 30
c) 250 d) All of the above
- Q.6 A _____ is used to level the ground and spreads the loose materials.
- a) Excavator b) Scraper
c) Grader d) Tractor

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The function of tractor clutch is to disconnect power from gear box. (True/False)
- Q.8 Differential lock is used to provide equal powers to both the wheels. (True/False)
- Q.9 The function of tyre is to absorb the shocks. (True/False)

(2)

220363A

- Q.10 Hydraulic oil used in hydraulic system is _____ (Compressible / incompressible).
- Q.11 Name any two manufacturer of tractor situated in Haryana.
- Q.12 Define earth moving machinery.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the working of single plate clutch.
- Q.14 Explain double clutch system.
- Q.15 Draw a layout of independent drive PTO shaft.
- Q.16 Describe the various forces acting on a tractor on move.
- Q.17 Describe specification of tyre with suitable example.
- Q.18 Write main functions of Hydraulic system?
- Q.19 Describe the salient features of tyres.
- Q.20 Describe the safe tractor operating procedure.
- Q.21 Classify various Earth moving machinery.
- Q.22 Explain the maintenance checks before starting the engine.
