

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Write IUPAC names of following compounds—

- a) C_6H_6
- b) CH_3COOH
- c) CH_3CHO
- d) $CH_3CH=CHCH_3$
- e) $CH_3CH_2CH_3$

Q.24 What are alkynes? Write the chemical properties of alkynes. What are the uses of alkynes?

Q.25 Define boiling point of an organic compound. Discuss the method of determination of boiling point of an organic compound with the help of a neat and labeled diagram.

No. of Printed Pages : 4

220523

Roll No.

2nd Sem / Chemical, Chem P & P

Subject : Organic Chemistry

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Compounds having $C=C$ are known as

- a) alkanes
- b) aromatic
- c) Alkenes
- d) alkynes

Q.2 What is the main characteristic of homocyclic compounds

- a) it contains a N atom in the ring
- b) it contains only C atoms in the ring
- c) it contains benzene ring
- d) It contains O, N and S atoms in the ring

Q.3 Functional group of aldehydes is

- a) $-CHO$
- b) $-OH$
- c) $-CO-$
- d) $-COOH$

- Q.4 Which of the following is true about alkanes
- They are highly reactive
 - They are chemically inert under ordinary conditions
 - They readily dissolve in water
 - They are aromatic compounds
- Q.5 Which method is used to remove volatile impurities from non volatile solids
- Crystallization
 - Chromatography
 - Distillation
 - Sublimation
- Q.6 The function of anti skinning agents in paints is to
- prevent surface film formation in storage
 - improve gloss
 - increase thickness
 - act as colorant

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Give 2 examples of saturated compounds.
- Q.8 General formula of alkenes is _____
- Q.9 State one use of alkynes
- Q.10 Chlorination of methane in presence of sunlight is an example of _____ reaction (Elimination /Substitution)

(2)

220523

- Q.11 Driers in paints are mainly _____
- Q.12 Give 2 examples of pigments used in paints.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Define _____ Aliphatic compounds, Aromatic compounds.
- Q.14 State 4 points of difference between organic compounds and inorganic compounds
- Q.15 Write the molecular formula and IUPAC name of first 4 members of homologous series of alkanes.
- Q.16 Define Homologous series. What are the characteristics of homologous series?
- Q.17 Write a short note on addition of hydrogen and water on alkenes.
- Q.18 How can we prepare alkynes by using calcium carbide CaC_2 . Explain with example.
- Q.19 Define addition reactions taking suitable examples.
- Q.20 Briefly describe the method of preparation of Lassaigne Extract.
- Q.21 Show the process of manufacturing of paint using a flow chart.
- Q.22 Define the terms - Bleeding, Peeling in context of paint defects.
