

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain in detail paint manufacturing process with the help of neat flow sheet. (CO2)

Q.24 Discuss any four paint defects. (CO4)

- a) Bleeding b) Blooming
- c) Embrittlement d) Sagging
- e) Blistering

Q.25 Write short note on :

- a) Electro deposition coating (CO3)
- b) Tinting strength and shellac (CO1)

No. of Printed Pages : 4

220555A

Roll No.

5th Sem/ Chemical, Chemical (Pulp & Paper) Subject : Paint Technology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The liquid part of paint is called as (CO1)

- a) Pigment b) Solvent
- c) Drier d) Vehicle

Q.2 Water based paint is also known as (CO1)

- a) Acrylic paint b) Alkyds paint
- c) Latex paint d) Acrylic & latex paint

Q.3 Additives which increases the viscosity of paints are called. (CO1)

- a) Thickening agent b) Surface modifiers
- c) Defoamers d) Surface active agent

Q.4 Formation of breaks in the paint film that expose the underlying film is called. (CO4)

- a) Checking b) Cracking
- c) Fading d) Foaming

Q.5 Which of the following is not a fundamental parameter used in formulation of paint? (CO2)

- a) Solvent content
- b) Solid Content
- c) Pigment to binder ratio
- d) Pigment volume concentration

Q.6 In which of the following paint application technique, the article is completely immersed in a tank containing paint. (CO3)

- a) Spray coating b) Powder coating
- c) Dip coating d) Roller coating

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Define Enamel. (CO1)
- Q.8 Name any one inorganic white pigment. (CO2)
- Q.9 Define Pigment to binder ratio. (CO2)
- Q.10 Define Erosion w.r.t. paint defect. (CO4)
- Q.11 Write full form of OEM paint. (CO2)
- Q.12 Name any one oxygenated solvent used in paint industry. (CO1)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Write a short note on OEM paints. (CO2)
- Q.14 Write a short note on varnishes. (CO2)
- Q.15 Explain in brief PVC and CPVC parameters used in paint formulation industry. (CO3)
- Q.16 Explain in brief brush coating and roller coating. (CO3)
- Q.17 Describe in brief Aeration and Aging paint defect. (CO4)
- Q.18 Explain in brief Primer, Undercoat and Final coat. (CO1)
- Q.19 Explain in brief the advantages of surface coating. (CO1)
- Q.20 Explain in brief the classification of pigments with the help of flow diagram. (CO1)
- Q.21 Explain in brief surface active agents additives used in paint industry. (CO1)
- Q.22 Discuss in brief the significance or importance of solvents used for paint manufacturing. (CO2)
