

Q.22 Explain the concept of pulp blending in brief?

### SECTION-D

**Note:** Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 What is freeness? Describe the equipment used for measurement of freeness of pulp in details?

Q.24 Describe the construction and working of the conical refiner in detail with the help of a neat diagrams?

Q.25 Write short note on:-

- a) Consistency regulator
- b) Bursting Strength
- c) Beater.

### 3rd Sem / Chemical (Pulp & Paper)

### Subject : Stock Preparation - I

Time : 3 Hrs.

M.M. : 60

### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 What is the role of fillers in papermaking?

- a) To make the paper waterproof
- b) To increase the strength and opacity of the paper
- c) To improve the printability of the paper
- d) To adjust the colour of the paper

Q.2 Thickeners are used for increasing \_\_\_\_\_ of slurry?

- a) Bonding                      b) Water
- c) Consistency                d) None

Q.3 When is the most effective time to blend pulps to achieve the best strength properties?

- a) After the beating process
- b) Before any refining has occurred

(1)

220635

- c) After the paper has been formed
- d) During the pulping process itself

Q.4 Where the waste paper is used?

- a) Beating                      b) Refining
- c) Hydrapulper              d) Agitator

Q.5 The process where mechanical or chemical action causes cellulose fibres to split into thinner, smaller fibrils?

- a) Blending                      b) Fibrillation
- c) Cutting                      d) Pulping

Q.6 What is the main purpose of screening in stock preparation?

- a) To remove water from the pulp
- b) To remove contaminants and impurities from the pulp
- c) To add chemicals to the pulp
- d) To dry the paper sheet

### SECTION-B

**Note:** Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define term opacity used in paper making process.

(2)

220635

Q.8 BSF full form is \_\_\_\_\_

Q.9 What is the effect of consistency in beating?

Q.10 One use of hydrapulper.

Q.11 What is the objective of Refining?

Q.12 Why  $\text{CaCO}_3$  is used in stock preparation in paper?

### SECTION-C

**Note:** Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 What is the difference between consistency & freeness?

Q.14 Describe the working of any one save all used in paper industry?

Q.15 Discuss the theory of beating in brief?

Q.16 Write procedure for measuring the degree SR of beaten pulp slurry.

Q.17 Write the method of measuring the specific surface of paper.

Q.18 Explain the de-zurik consistency regulator in brief?

Q.19 Draw a neat sketch hydrapulper.

Q.20 Write any three methods for measuring the fibre length.

Q.21 Differentiate pigments and paper making dyes.
