

## SECTION-D

**Note:** Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain general description of modern fourdrinier paper machine and operation of various accessories of wire part.

Q.24 Explain with neat flow diagram back water system and its significance.

Q.25 Explain with neat diagram the working principle of multiple centricleaners ( Upto tertiary Stage)

**4th Sem / Chemical (Pulp & Paper)**

**Subject : Paper Making - I**

Time : 3 Hrs.

M.M. : 60

## SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The fan pump is also called:

- Centrifugal stock pump
- Positive displacement pump
- Air removal pump
- High-pressure pump

Q.2 Pneumatic system used-

- a) Water                      b) Oil  
c) Air                         d) All

Q.3 The purpose of the Dandy roll in a fourdrinier machine is:

- a) To dry the paper sheet

- b) To press the paper sheet
- c) To improve sheet formation of watermarks
- d) To guide the wire

Q.4 The pressing operation mainly increases:

- a) Sheet dryness and bonding
- b) Fiber beating
- c) Sheet brightness
- d) Headbox consistency

Q.5 PH of alkaline water is

- a) equal to 7                      b) less than 7
- c) more than 7                  d) Zero

Q.6 Water drainage increases due to \_\_\_\_ in temperature.

- a) Decrease                      b) Increase
- c) no change                    d) None

### SECTION-B

**Note:** Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 What is the function of table roll?

Q.8 Write one difference between fourdrinier, machine and twin wire former.

Q.9 Define Pulp Consistency.

Q.10 Define term press crowning.

Q.11 Name any two types of vacuum pumps used in paper mills.

Q.12 On what principles centricleaness works.

### SECTION-C

**Note:** Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain in brief the working of turbo compressor.

Q.14 Explain in brief any one wire changing method.

Q.15 Write down start up duties of a machine tender.

Q.16 Explain any one pressure screen in brief.

Q.17 Explain the working of open headbox with neat diagram.

Q.18 A paper machine is running at a speed of 500 m/min. Calculate the head rewired in an open headbox.

Q.19 Explain in brief the working of an twin-wire former.

Q.20 Explain in brief the working of Krofta clarifier used for recovery of fiber & chemicals from back water ( White water)

Q.21 Explain sheet transfer operation in brief.
