

- Q.20 How can training programs help in accident prevention?
- Q.21 Classify fires and explain any one type with an example.
- Q.22 Explain the safe disposal methods of hazardous chemicals.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Describe the various types of fire extinguishers and their applications.
- Q.24 Describe the role of Personal Protective Equipment (PPE) in ensuring worker safety in the chemical industry. Discuss the different types of PPE used
- Q.25 Write short note on any two of the following :
- Toxicology
 - Importance of Safety
 - Safety in chemical Industry
 - Fire Prevention

No. of Printed Pages : 4
Roll No.

220664C

6th Sem / Chemical (Pulp & Paper)

Subject : Industrial Hazards and Safety

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which of the following is NOT a common hazard classification?
- Chemical
 - Physical
 - Biological
 - Emotional
- Q.2 What does BLEVE stand for?
- Basic Liquid Evaporation Volume Explosion
 - Boiling Liquid Expanding Vapor Explosion
 - Burning Liquid Evaporation Vapor Effect
 - Basic level Emission vapor Event
- Q.3 Which of the following is a key safety practice for handling flammable liquids?
- Storing them near ignition sources
 - Using proper ventilation

(60)

(4)

220664C

(1)

220664C

- c) Pouring them from a height
 - d) Mixing them with other chemical without knowing their compatibility.
- Q.4 What is the purpose of personal protective equipment (PPE)?
- a) To eliminate all hazards
 - b) To minimize the risk of injury from hazards
 - c) To increase productivity
 - d) To make workers look uniform
- Q.5 What three things make a fire?
- a) Water, ice, snow
 - b) Sun, moon, stars
 - c) Fuel, heat, air
 - d) Rocks, trees, flowers
- Q.6 What do we call things that burn easily?
- a) Wet things b) Cold things
 - c) Flammable things d) Heavy things

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Define “Hazard” and give one examples.

(2)

220664C

- Q.8 Name three components of Fire triangle.
- Q.9 Write any one step to be taken while handling explosive in the chemical industry?
- Q.10 Define “flammability” and give an example of a flammable substance.
- Q.11 What is the purpose of “first aid” in accident management?
- Q.12 Expand TLV

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Explain the role of management in industry safety.
- Q.14 List common hazardous gases used in the industry and their effects.
- Q.15 Explain any four common causes of industry accidents.
- Q.16 Describe the concept of fire triangle with a neat diagram.
- Q.17 Discuss the importance of labeling and proper storage of chemicals.
- Q.18 Define safety and loss prevention. Why are they important in industries?
- Q.19 Define Toxicity. How does it affect the human body.
