5th Sem/ Civil
Subject : Solid Waste Management

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 What is a major by product of the incineration process?
- a) Ash
 - b) Paper
 - c) Plastic
 - d) Glass
- Q.2 What is the recommended container for storing food and biodegradable waste at home?
- a) A plastic bag
 - b) A cardboard
 - c) A non-corrosive container
 - d) A galvanized steel bin
- Q.3 How often should recyclable materials typically be collected according to the measures?
- a) Daily
 - b) Weekly
 - c) Monthly
 - d) At longer regular interval

- Q.4 What is the first step in the waste management hierarchy?
- a) Reuse b) Prevention
 - c) Recycling d) Disposal
- Q.5 Which product not typically produced by pyrolysis?
- a) Plastic b) Bio-Oil
 - c) Char d) Syngas
- Q.6 Which organisms are important in aerobic composting?
- a) Anaerobic bacteria
 - b) Thermophilic bacteria
 - c) Pathogens
 - d) Earthworm

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 E-Waste is burned at _____ temperature in incineration.
- Q.8 _____ is the main goal of waste prevention.
- Q.9 In incineration a method used to dispose of biomedical waste? Y/N
- Q.10 _____ is the ideal temperature range for effective composting.

- Q.11 In waste management, _____ is the liquid that drains from a landfill and may contain harmful substances that can contaminate soil and groundwater.
- Q.12 The stabilization of the waste in the Dano process typically takes _____ days.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Name the various sources of solid waste and explains any two of them.
- Q.14 Describe Indore method of composting?
- Q.15 Enlist the purpose of recycling of waste. (Any five)
- Q.16 Write the Physical characteristic os solid waste. (Any five)
- Q.17 Classify the solid waste based on its hazardous properties with at least two examples.
- Q.18 What is the method of Pyrolysis of waste.
- Q.19 Describe the types of composting.
- Q.20 Enlist any four advantages and disadvantages of landfill technique of waste disposal.
- Q.21 What is the role of the ragpickers for society?
- Q.22 Discuss the need for leachate management in landfill sites.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the various methods of collection of Municipal solid waste.
- Q.24 What are the different types of vehicles used for transportation of municipal solid waste? Explain their functions and capacity.
- Q.25 Explain the process of waste management and the method of waste disposal.
