6th Sem/ Civil
Subject : Earthquake Resistant Building Constructions

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Shear failure in masorary is observed by
a) Vertical cracks b) Diagonal Crack
c) Horizontal cracks d) Longitudinal crack
- Q.2 Delhi have been place in the zone number.
a) IInd Zone b) IVth zone
c) Vth zone d) IIIrd Zone
- Q.3 The minor shocks preceding the major earthquake are called
a) Tectonic b) Fore shocks
c) Epicentre d) Tsunami
- Q.4 ____ refers to preventing hazards from developing into disasters
a) Response b) Mitigation
c) Preparedness d) Recovery

- Q.5 An important property which are earthquake resistant building have
- | | |
|----------------|------------------|
| a) Ductility | b) Flexibility |
| c) Brittleness | d) None of these |
- Q.6 S-Waves can travel through
- | | |
|-----------|---------------------|
| a) Solids | b) Gas |
| c) Liquid | d) All of the above |

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 _____ waves are most destructive in nature.
- Q.8 Himalayan and Indo Grangetic plains are in the _____ seismic zones.
- Q.9 The hitting action of the adjacent buildings of different height during earthquake is called as _____.
- Q.10 ASR stands for _____.
- Q.11 Removal of people to safer place is called _____.
- Q.12 Liquefaction occurs due to action of _____

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Differentiate b/w earthquake magnitude of intensity.
- Q.14 Define seismology. Why is study of earthquake is important for civil engineers.

- Q.15 Explain how retrofitting of traditionally built construction is done.
- Q.16 Enlist five characteristic of surface waves.
- Q.17 What is the purpose of shear wall in buildings.
- Q.18 What do you understand by irregular Buildings.
- Q.19 Explain types of horizontal bands used in Masonry Buildings.
- Q.20 What are the importance of I.S. 1893-2000 in the design of earthquake resistant building.
- Q.21 Explain the objective of disaster management.
- Q.22 What is the meaning of "REPEAT" in rescue by step?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 What are the precautions to be taken while planing and designing of earthquake resistant building?
- Q.24 What are the types of rescue workers? Explain their role during the disaster?
- Q.25 Write a detailed note on special constructor methodologies?
