

Q.22 List the different factors affecting microbial growth.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Differentiate between:

- a) Gram positive bacteria and Gram negative bacteria
- b) Prokaryotes and Eukaryotes

Q.24 How does isolation of pure culture is carried out by

- a) Streak plate method
- b) Pour Plate Method

Q.25 Explain the various mode of reproduction in fungi. Summarize the significance of yeasts and moulds too in food technology listing appropriate examples.

No. of Printed Pages : 4

221115/121125/031125

Roll No.

1st Sem / Food Technology

Subject : Basic Microbiology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Mycology is study of

- a) Protozoa b) Fungi
- c) Helminthes d) Bacteria

Q.2 Concept of pasteurization was given by

- a) Paul Ehrlich b) Louis Pasteur
- c) Alexendar Fleming d) Robert koch

Q.3 CFU stands for

- a) Cell Forming Units
- b) Culture Forming Units
- c) Colony forming Units
- d) All

- Q.4 Bacteria reproduce asexually by
- a) Binary fission b) Tertiary Fission
 - c) Replication d) Conjugation

- Q.5 Food borne bacteria includes
- a) Bacillus cereus
 - b) Campylobacter jejuni
 - c) Clostridium tetani
 - d) All

- Q.6 Thermal destruction of microorganisms follows
- a) Zero order b) Fractional order
 - c) Second order d) First order

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Define the term Conidiospore.
- Q.8 Tell the principle behind moist heat sterilization.
- Q.9 Give the full form of HTST.
- Q.10 Define Z value
- Q.11 How obligatory anaerobes differ from facultative aerobes.

- Q.12 Define the term Aseptic Technique.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Give example of justify the economical significance of yeast in food industry.
- Q.14 Classify the bacteria on the basis of different shapes with the help of labeled diagram.
- Q.15 How simple staining of bacteria is carried out?
- Q.16 Infer the statement “Sterilization has increased the shelf life of and stability of products of a significant extent”
- Q.17 Analyze the outcomes upon treating bacterial smears with Gram stain in a microbiological experiment.
- Q.18 Tell the functions of Ribosomes and Nucleus in an eukaryotic cell.
- Q.19 Discuss the structural components of a microscope with the help of diagram.
- Q.20 “Radiation sterilization has been also known as cold sterilization”. Interpret the statement.
- Q.21 Show the location of different organelles in a well labeled diagram of typical bacterium.
