Subject : Food Microbiology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 The principal microorganism for yogurt is _____
- a) Streptococcus thermophilus
 - b) Leuconostoc citrovorum
 - c) Lactobacillus acidophilus
 - d) Streptococcus lactis
- Q.2 Lag phase is also known as _____
- a) period of initial adjustment
 - b) transitional period
 - c) generation time
 - d) period of rapid growth

Q.3 The temperature resistance of microorganism in high acid food is-

- a) High b) Medium
- c) Low d) No effect

Q.4 Black mould rot is caused by-

- a) Flavus b) Aspergillus niger
- c) Trichoderma d) Bifidobacterium

Q.5 E-coli has a number of group pathogens -

- a) Three b) Two
- c) Four d) Five

Q.6 Any change that renders food unfit for human consumption is called-

- a) Processing b) Spoilage
- c) Deterioration d) Preservation

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define food preservation.

Q.8 Define chilling.

Q.9 Enlist various chemical antimicrobial agents.

Q.10 Define food poisoning.

Q.11 Enlist the products of microbial growth.

Q.12 Define food fermentation.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 What are the antimicrobial agents? Why they are added to food?

Q.14 Write a short note on food borne pathogens?

Q.15 What are the various causes of food spoilage?

Q.16 What is the difference between pasteurization and sterilization?

Q.17 Write down microbiology of bread.

Q.18 How milk should be preserved from contamination?

Q.19 What is food microbiology? Give its objectives?

Q.20 Write down the microbiology of meat?

Q.21 What are the factors influencing the growth of microorganisms in milk?

Q.22 Which type of spoilage occurs in butter?
