

- Q.16 Discuss different types of force involved in the size reduction process
- Q.17 Explain the different applications of the crystallization process.
- Q.18 Write short notes on cyclone separators.
- Q.19 Explain the micro and ultrafiltration process.
- Q.20 Discuss any four screens used in the sieving process
- Q.21 Differentiate sorting and grading process
- Q.22 Write down the criteria for the selection of mixing equipment.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Discuss different types of distillation process and their applications in food industries.
- Q.24 Explain the different types of screens used in the sieving process.
- Q.25 Discuss different types of cleaning equipment and their applications in food industries.

2nd Sem / Food Technology

Subject : Unit Operations in Food Processing

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Ball mill is used for_____
- a) Course grinding b) Fine grinding
- c) Both of the above d) None of the above
- Q.2 Which process is an example of a distillation process?
- a) Separation of salt from water
- b) Separation of sugar from water
- c) Separation of ethanol from water
- d) Extraction of juice from fruits

Q.3 Crystallization process occurs in_____?

- a) Formation of ice crystal
- b) Extraction of juice
- c) Fat separation
- d) None of the above

Q.4 Evaporation occurs during_____?

- a) Cooking process b) Khoa making
- c) Sugar making d) All of the above

Q.5 Cyclone separator is used to separate which of the mentioned?

- a) Solids particle from liquid
- b) Liquid particles from liquid
- c) Solid and liquid particles from gases
- d) Solids from gases only

Q.6 The rate of filtrations is maximum at

- a) Early stage
- b) Middle stage
- c) The final stage
- d) Uniform throughout the filtration process

(2)

221125

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Mention two types of cleaning methods _____ and_____.

Q.8 ASTM stands for_____.

Q.9 Evaporation occurs during the filtration process (True/False)

Q.10 Name any two types of separators _____ and_____

Q.11 Homogenization is a type of size reduction process (True/False)

Q.12 Sorting separate food based on the physiochemical properties (True/False)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Differentiate crushing and grinding methods.

Q.14 Write short notes on types of cleaning methods used in food industries.

Q.15 Draw a neat and clean diagram of distillation processing mentioning its components.
