

Q.21 What is an inductive transmitter? How it is different from electric transmitters?

Q.22 Write any four differences between PAM and PCM.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 What are the basic elements of general telemetry systems? Write any two applications of telemetry. Explain Land line telemetry.

Q.24 What are the different types of transmitter? Draw and explain electric transmitter.

Q.25 Write four advantages and disadvantages each of digital data transmission over analog transmission.

No. of Printed Pages : 4
Roll No.

221561

6th Sem/ Instrumentation & Control Subject : Industrial Communication Technology

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 _____ is the automated process of measuring and wirelessly transmitting data from remote sources.

- a) Tele medicine b) Telemetry
- c) Transmitter d) Receiver

Q.2 A voltage telemetry is a

- a) Land line telemetry b) Pulse modulation
- c) Electric transmitter d) TDM

Q.3 _____ is a technique in which the total band width available in a communication medium is divided into series of non-overlapping frequency bands.

- a) TDM b) PCM
- c) FDM d) PAM

Q.4 A live zero in 4-20 mA current transmitter refers to the fact that the signal starts at a _____ value.

- a) 0 mA b) 16 mA
- c) 20 mA d) 4 mA

Q.5 A PDPT bellow is a/an

- a) Electric transmitter
- b) Pneumatic transmitter
- c) Hydraulic transmitter
- d) All of the above

Q.6 FDM refers to

- a) Frequency division multiplexing
- b) Frequency demodulation multiplexing
- c) Frequency data multiplexing
- d) None of the above

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define telemedicine.

Q.8 Write the full form of PDPT.

Q.9 Give any one example of pneumatic transmitter.

Q.10 Expand PCM.

Q.11 Define LAN.

Q.12 A _____ in 4-20 mA current transmitters is a situation where the loop current becomes 0 mA.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Define telemetry. Write any two applications of it.

Q.14 Explain current and position telemetry.

Q.15 Define PAM with example.

Q.16 Explain amplitude and frequency modulation in brief.

Q.17 Draw and explain the PDPT diaphragm type pneumatic transmitter.

Q.18 What is GPIB.

Q.19 Write any 4 disadvantages of digital data transmission over analog transmission.

Q.20 Draw and explain force balance type pneumatic transmitters.
