

Time : 3 Hrs.

M.M. : 60

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Where does the granular molding material get loaded into?
- a) Split b) Pellets
- c) Barrel d) Hopper
- Q.2 An example for natural polymer is
- a) Plastic b) Wood
- c) Rubber d) None of these
- Q.3 What is the minimum temperature allowed for injection molding process?
- a) 140 b) 120
- c) 150 d) 130
- Q.4 In blow molding, to inflate soft plastic, which medium is used?
- a) Air b) Oil
- c) Alcohol d) Water

- Q.5 Which of the following material is not made by injection molding?
- a) Nut b) Electrical fitting
c) Tube d) Car handles
- Q.6 The process of shaping hot sheet of thermoplastic into desired shape by mechanical method is called
- a) Thermoforming b) Blow
c) Rotational d) All of these

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 List the two components made by injection molding.
- Q.8 Give the use of ejector plate.
- Q.9 The function of neck insert is _____.
- Q.10 Side gate location can be possible in two plate injection molding (True/False)
- Q.11 What is extrusion?
- Q.12 What is draft angle?

SECTION-C

Note: Short answer type questions. Attempt any three questions out of five questions. (3x6=18)

- Q.13 Differentiate between two plate mold and hot runner mould.

- Q.14 Explain ejection returns systems in detail.
- Q.15 Describe the constructional features of semi positive molding.
- Q.16 Explain briefly moulding defects.
- Q.17 What is mold cycle?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x15=30)

- Q.18 Design and draw a multi-cavity semi-positive type mold for electrical switch.
- Q.19 Explain the following:
- a) Types of moulding machines
b) Materials used for various Mould Parts.
- Q.20 Design and draw a three plate injection mold for a 10mm bolt.
