6th Sem / Mechanical (Tool & Die Design)

Subject : Automobile Engineering

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Where is clutch located?

- a) Between transmission and rear axle
- b) Between transmission and engine
- c) Between transmission and differential
- d) Between transmission and axle

Q.2 Which is not friction clutch?

- a) Centrifugal b) cone
- c) Fluid d) Disc

Q.3 Where is overdrive located ?

- a) Between transmission and engine
- b) Between transmission and axle
- c) Between transmission and differential
- d) Between transmission and propeller shaft

Q.4 What is angle between steering axis and vertical in plane of wheel?

- a) Camber b) kin pin inclination
- c) Toe-in d) castor

Q.5 In disc brakes disc is attached to

- a) suspension b) drum
- c) wheel d) Axle

Q.6 The type of wheel which cannot used with a tubeless tyre is

- a) wire wheel b) Alloy
- c) steel wheel disc d) composite wheel

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define Chassis.

Q.8 Expand EBD.

Q.9 Expand CVT.

Q.10 Define self driven cars

Q.11 Define Toe in .

Q.12 Define Regulators.

(2)

221865

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain Layout of chassis.

Q.14 Explain four wheel drives.

Q.15 Explain ADAS.

Q.16 Explain caster & camber.

Q.17 Explain the working of Alternator

Q.18 List functions of Braking system

Q.19 Explain the various types of Batteries.

Q.20 Explain Air suspension

Q.21 Write short note on ABS

Q.22 Explain the function of universal Joint.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain the working of Mechanical Brake with diagram.

Q.24 Explain the working of Telescopic type absorber with diagram.

Q.25 Draw and explain constant mesh gear box.
