**3rd Sem / DMLT, DMLT(For Speech and
Hearing Impaired)
Subject : Parasitology & Virology / Clinical
Microbiology - III**

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Giardia Lamblia primarily affects which part of the human body?

- a) Large intestine b) Small intestine
- c) Liver d) Lungs

Q.2 Ancylostoma duodenale is commonly known as:

- a) Threadworm b) Hookworm
- c) Pinworm d) Whipworm

Q.3 The infective stage of Plasmodium for humans is:

- a) Sporozoite b) Trophozoite
- c) Gametocyte d) Merozoite

- Q.4 The concentration technique used for detecting protozoan cysts in stool is :
- a) Floatation b) Sedimentation
 - c) Both a and b d) None of the above
- Q.5 The virus causing Hepatitis A is transmitted by:
- a) Blood transfusion b) Feco-oral route
 - c) Sexual contact d) Airborne route
- Q.6 The most effective way to prevent HIV infection is:
- a) Antibiotics
 - b) Vaccination
 - c) Safe sexual practices and screening
 - d) Antiviral sprays

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The study of worms and their parasitic relationship with humans is known as _____.
- Q.8 The eggs of *Ascaris lumbricoides* become infective after _____ days in soil.
- Q.9 *Entamoeba histolytica* causes_____.

- Q.10 The diagnostic stage of *Giardia lamblia* in stool is the_____.
- Q.11 The virus responsible for COVID-19 is called_____
- Q.12 Hepatitis E virus is mainly transmitted by the _____ route.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Define parasite and host. Mention types of hosts with examples.
- Q.14 Write short note on classification of helminths.
- Q.15 Describe the method of collection and preparation of PBF for detection of malaria parasite.
- Q.16 Explain the floatation method used for concentration of stool samples.
- Q.17 Write short note on morphology and laboratory diagnosis of *Ancylostoma duodenale*.
- Q.18 Describe the life cycle and infection mode of *Taenia saginata*.
- Q.19 Write a short note on a laboratory diagnosis of *Giardia Lamblia*.
- Q.20 Describe the various stages of *Plasmodium vivax* seen in blood smear.

- Q.21 Write short note on structure and types of viruses.
- Q.22 Explain briefly the collection and storage of samples for virological study.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the morphology, life cycle and laboratory diagnosis of *Ascaris lumbricoides* with a neat diagram.
- Q.24 Describe the structure, Pathogenicity, and laboratory diagnosis of Corona virus.
- Q.25 Discuss in detail the morphology, life cycle, and laboratory diagnosis of malaria parasite (*P. vivax* and *P. falciparum*).
