

No. of Printed Pages : 4

221932/181932/121932

Roll No.

/031932

**3rd Sem / DMLT, DMLT (For Speech
and Hearing Impaired)**

**Subject : Clinical Haematology- I /Haematology - III /
Clinical Haematology - III**

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The normal reference range of ESR in adult males is:

- a) 0-15 mm/hr b) 20-30 mm/hr
- c) 10-25 mm/hr d) 5-10 mm/hr

Q.2 The causative agent of Hepatitis C is :

- a) Hepatitis A virus b) Hepatitis B virus
- c) Hepatitis C virus d) Hepatitis E virus

Q.3 MCV stands for:

- a) Mean corpuscular Volume
- b) Mean Cell Variation
- c) Mean Corpuscular Value
- d) Mean Cellular Volume

(1) 221932/181932/121932

/031932

Q.4 Reticulocyte count primarily indicates:

- a) WBC production
- b) Platelet production
- c) RBC production
- d) Hemoglobin synthesis

Q.5 Tart cells are seen in:

- a) Iron deficiency anemia
- b) Megaloblastic anemia
- c) Autoimmune disorders
- d) Aplastic anemia

Q.6 Red cell fragility test is useful in diagnosing:

- a) Iron deficiency anemia
- b) Spherocytosis
- c) Pernicious anemia
- d) Leukemia

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Write the formula for MCHC.

(2) 221932/181932/121932
/031932

- Q.8 Mention the normal reference range of reticulocyte count in adults.
- Q.9 State one factor affecting ESR.
- Q.10 Name one supravital stain used for reticulocyte counting.
- Q.11 Give one laboratory feature of megaloblastic anemia.
- Q.12 Define PCV

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the principle of ESR estimation using the Westergren method.
- Q.14 Explain the procedure of PCV estimation by microhematocrit method.
- Q.15 What are MCV, MCH, and MCHC and give their normal reference ranges.
- Q.16 Explain the principle and procedure of reticulocyte counting.
- Q.17 Discuss physiological variations in Hb, PCV and platelet counts.
- Q.18 Write classification of anemia based on morphology.

- Q.19 Describe laboratory diagnosis of iron deficiency anemia.
- Q.20 Describe laboratory diagnosis of megaloblastic anemia.
- Q.21 Explain the principle and clinical significance of red cell fragility test.
- Q.22 Differentiate LE cell from Tart cell in autoimmune disorder.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the laboratory diagnosis of hemolytic anemia, including sickle cell anemia.
- Q.24 Explain red cell indices (MCV, MCH, MCHC) with their calculation, reference ranges, and clinical interpretation.
- Q.25 Describe ESR estimation with any one method, factors affecting it, and interpretation of results.
