**4th Sem / DMLT, DMLT (For Speech
and Hearing Impaired)
Subject : Clinical Haematology - II**

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which of the following is the primary function of platelets in haematostasis?
- a) Blood coagulation
 - b) Blood vessel constriction
 - c) Formation of a platelet plug
 - d) Activation of the coagulation cascade
- Q.2 What is the normal range for prothrombin time (PT)?
- a) 10-15 seconds b) 12-18 seconds
 - c) 15-20 seconds d) 18-22 seconds
- Q.3 Which type of bone marrow is considered “active” and responsible for haematopoiesis?

- a) Red marrow b) Yellow marrow
c) White marrow d) All of the above
- Q.4 What is the primary site of hematopoiesis in adults?
a) Bone marrow b) Spleen
c) Liver d) Lymph nodes
- Q.5 Which of the following is a characteristics of acute myeloid leukemia (AML)?
a) Presence of Auer rods
b) Presence of blasts in the bone marrow
c) Absence of Auer rods
d) All of the above
- Q.6 Which of the following is a method of demonstrating LE Cell (Lymphocyte E rosette formation)?
a) E rosette formation b) T rosette formation
c) B rosette formation d) None of the above

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The process by which platelet aggregate to form a platelet plug is called_____.

- Q.8 The normal range for international normalized ratio (INR) is_____.
- Q.9 The bone marrow is responsible for the production of_____.
- Q.10 Haematology is the branch of biology which deals with study of blood. (True/False)
- Q.11 Time taken for the whole blood to clot in vitro is called_____.
- Q.12 Expand the term CSF_____.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the process of blood coagulation.
- Q.14 What are the different types of bleeding disorders?
- Q.15 What is the significance of prothrombin time (PT) in clinical practice?
- Q.16 Explain the process of preparation of bone marrow smears.
- Q.17 What is the difference between Red bone marrow and yellow bone marrow?
- Q.18 What is the difference between LE cell and Tart cell?
- Q.19 Write the composition of seminal fluid.

- Q.20 What is the principle and procedure of APTT?
- Q.21 Draw the normal and abnormal morphology of sperm.
- Q.22 What is the significance of bone marrow examination in clinical practice?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Describe the laboratory diagnosis of acute lymphoid leukemia (ALL).
- Q.24 Write the interpretation of semen analysis in detail.
- Q.25 Write down the Principle, procedure and clinical significance of BT/CT in detail.
