

No. of Printed Pages : 4

221944

Roll No.

**4th Sem / DMLT, DMLT (For Speech
and Hearing Impaired)
Subject :Immunology and Mycology**

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 What is the main characteristic of medically important fungi?
- a) They are all Gram-positive
 - b) They are all Gram-negative
 - c) They are all aerobic
 - d) They are all anaerobic
- Q.2 Which of the following is a type of fungal culture medium?
- a) Sabouraud's dextrose agar (SDA)
 - b) Corn meal agar (CMA)
 - c) Brain heart infusion (BHI)
 - d) All of the above

- Q.3 What is the primary function of the India ink preparation?
- a) To detect fungi b) To detect bacteria
 - c) To detect viruses d) To detect parasites
- Q.4 What is the main difference between agglutination and precipitation?
- a) The type of antibody used
 - b) The type of antigen used
 - c) The type of enzyme used
 - d) The type of substrate used
- Q.5 What is the primary function of the ASO test?
- a) To detect streptococcal infections
 - b) To detect rheumatoid factor
 - c) To detect CRP
 - d) To detect VDRL
- Q.6 What is the main characteristic of CRP?
- a) It is an antibody b) It is an antigen
 - c) It is a complement d) It is a cytokine

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The process by which fungi are identified is called_____.
- Q.8 The normal range for fungal growth in culture is_____.
- Q.9 The primary function of the LCB preparation is to_____.
- Q.10 CRP stands for_____.
- Q.11 ELISA is used to detect_____.
- Q.12 Full form of KOH is_____.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the process of fungal cultivation.
- Q.14 What are the different types of laboratory contaminants?
- Q.15 What is the significance of antigen-antibody reactions in clinical practice?
- Q.16 Describe the process of agglutination.

- Q.17 What is the difference between direct and indirect ELISA?
- Q.18 Describe the process of flocculation.
- Q.19 What is the clinical significance of rheumatoid factor?
- Q.20 What are the Laboratory contaminants?
- Q.21 Describe the process of precipitation.
- Q.22 What are the different types of fungal infections?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Write the principle and procedure of ASO?
- Q.24 Write the principle, procedure and clinical significance of WIDAL test?
- Q.25 Write a short note on
- a) Principle and procedure of Agglutination reaction.
 - b) Rheumatoid factor(RF)
