

No. of Printed Pages : 4

221945

Roll No.

**4th Sem / DMLT, DMLT(For Speech
and Hearing Impaired)
Subject :Analytical Clinical Biochemistry**

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Presence of glucose in urine is called?

- a) Glucosuria b) Proteinuria
- c) Ketosis d) Haematuria

Q.2 Which part of the kidney collects urine?

- a) Renal cortex b) Renal pelvis
- c) Renal Medulla d) Nephron

Q.3 What is the principle of electrophoresis?

- a) Separation of charged particles based on size and charge
- b) Separation of charged particles based on size only

- c) Separation of charged particles based on charge only
 - d) None of the above
- Q.4 Which of the following is a type of chromatography?
- a) Paper chromatography
 - b) Thin layer chromatography
 - c) Gas chromatography
 - d) All of the above
- Q.5 What is the clinical significance of T3, T4, and TSH?
- a) Diagnosis of thyroid disorders
 - b) Monitoring of thyroid function
 - c) Both a and b
 - d) None of the above
- Q.6 What is the definition of auto analysis in clinical biochemistry?
- a) Automated analysis of biochemical parameters
 - b) Manual analysis of biochemical parameters
 - c) Both a and b
 - d) None of the above

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The normal pH range of urine is _____.
- Q.8 The principle of urea clearance test is based on the concept of renal clearance. (True/False)
- Q.9 Expand the term HPLC _____.
- Q.10 RFT means _____.
- Q.11 Automated analyser increase the human errors. (True/False)
- Q.12 The movement of charge particles under an electric field is called _____.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the normal composition of urine.
- Q.14 What is the clinical significance of creatinine clearance in kidney function test?
- Q.15 What is the principle of paper chromatography?
- Q.16 What is the clinical significance of Anti thyroid peroxidase test?
- Q.17 Describe the process of electrophoresis.

- Q.18 What are the different types of chromatography.
- Q.19 Describe the principle of capillary electrophoresis.
- Q.20 Describe the process of auto analysis in clinical biochemistry.
- Q.21 What is the clinical significance of detecting ketones in urine?
- Q.22 Write clinical significance of detecting bilirubin in urine?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 a) Describe the laboratory diagnosis of renal disorders.
- b) Write principle and interpretation of occult blood test?
- Q.24 What are the different types of electrophoresis and their clinical significance?
- Q.25 Describe the clinical significance of T3, T4, and TSH.
