

- Q.21 Give five comparisons between capstan lathe and turret lathe.
- Q.22 Write five uses and applications of basic measuring instruments.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Draw a neat sketch of center lathe and label its various parts. Also write the names of various accessories used on lathe machine.
- Q.24 How do you classify the different types of drilling machine? Draw a neat sketch of upright drilling machine by labeling its various parts.
- Q.25 Explain principle parts of a milling machine with the help of neat sketch.

No. of Printed Pages : 4
Roll No.

222017

1st Year/ Advance Diploma in Tool and Die making Subject : Workshop Technology - I

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 The temperature range for soldering process is
- a) 40°C to 100°C
 - b) 180°C to 250°C
 - c) 300°C to 500°C
 - d) 600°C to 900°C
- Q.2 Which material is used to make power hacksaw blades?
- a) Tool steel
 - b) High speed steel
 - c) Mild steel
 - d) Medium carbon steel
- Q.3 Which of the following is an example of non cutting shaping process?
- a) Turning
 - b) Forging
 - c) Drilling
 - d) Milling

- Q4 The size of the planer is specified by the
- Maximum length of the stroke
 - Height of tool post
 - Height of its bed
 - All of the above
- Q.5 Which of the following operation can be performed on shaper?
- Gear cutting
 - Keyways cutting
 - Curvilinear contours
 - All of the above
- Q.6 The work holding device in surface grinding is known as
- Magnetic Chuck
 - Mandrel
 - Tool post
 - None of the above

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The speed at which the piece advances through the cutter is called _____
- Q.8 Bench drilling machine is also known as _____.
- Q.9 Name any one multipoint cutting tool.
- Q.10 Which metal cutting power saw is used for cutting heavy sections metals?

(2)

222017

- Q.11 The milling operation, in which two or more milling cutters are mounted on the same arbor is known as _____
- Q.12 A crank and slotted like mechanism is used in which machine?

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Write at least five safety precautions to be observed while drilling.
- Q.14 Briefly explain five different types of work holding devices used on milling machine.
- Q.15 Differentiate between wheel tuning and wheel dressing.
- Q.16 What are the common milling methods? Explain them with neat sketch.
- Q.17 Explain marking and shearing.
- Q.18 Write a short note on slotted link and gear mechanism applied to slotter.
- Q.19 Give the brief description of various types of drills. Explain any two types.
- Q.20 Describe the cutting parameters used on milling machine.
