

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain feed system used in plastic mould design and also explain its importance and limitations in plastic mould design (also draw sketch for the same)

Q.24 Discuss :

- a) Ejection techniques
- b) Hot runner mould and its importance.

Q.25 Write short note on :

- a) Cooling integer type mould plates and its type
- b) Types of parting surface.

No. of Printed Pages : 4

222233

Roll No.

3rd Sem / Plastic Technology

Subject : Design of Dies and Moulds - I

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The size of the runner depends on the size of the part and its wall thickness.

- a) True
- b) depends on both
- c) Does not depends on any of them
- d) false

Q.2 In compounds dies _____.

- a) Two or more cutting operations can be performed simultaneously
- b) Cutting and formation operations are combined and carried out in single operation
- c) Workpiece moves from one station to other with separate operation performed at each station
- d) All of the above

- Q.3 The male portion of a mold that shapes the interior of a hollow molded part is called _____
- a) Core b) Cavity
c) Runner d) Gate
- Q.4 _____ is produce by joining of cavity and core part of the mould.
- a) Meld line b) Breaking line
c) Parting line d) None of them
- Q.5 _____ of runner is important for uniform cavity filling.
- a) Fencing b) Balancing
c) Tapering d) None of these
- Q.6 Joining of two flow front during processing creates _____ lines.
- a) Weld lines b) Flow lines
c) Both a & b d) None of these

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Give function of sprue
- Q.8 Name two die-materials.

(2)

222233

- Q.9 Size of the gate should be kept _____ for good design.
- Q.10 Name the mould in which ejector grid is used.
- Q.11 Give two functions of gates.
- Q.12 Name two different types of cooling used in plastic moulds.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 State advantages of bolster plate
- Q.14 Explain frame type ejector grid.
- Q.15 Discuss runner size and balancing.
- Q.16 What do you understand y relief of parting surface?
- Q.17 Explain side core cavities for internal undercuts.
- Q.18 Name two cooling systems used in plastic moulds.
- Q.19 Name different types of mould clamping mechanisms.
- Q.20 What is sprue-puller? Discuss its role in ejection system.
- Q.21 Draw labeled diagram of two plate mould.
- Q.22 State various consideration of mould material.
