

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Write and explain four factors, which should be considered, while processing thermoset in injection molding machine.
- Q.24 Write four defects, their causes and remedies in rotomolding process.
- Q.25 With a neat sketch, write reciprocating screw blow molding process.

No. of Printed Pages : 4
Roll No.

222252

5th Sem / Plastic Technology

Subject : Plastic Processing Techniques - III

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 How does the piston of clamping unit in Injection molding machine moves.
- a) Pneumatic energy b) Hydraulic Energy
c) Heat Energy d) Suction
- Q.2 MFI of the plastics material to be used in Roto molding should be
- a) More than 5 b) Between 2 & 5
c) Less than 1 d) None of above
- Q.3 Which material is most commonly used in ISBN process.
- a) PE b) PP
c) PET d) PVC

- Q.4 Extrusion process can use.
- a) Die Only b) Mould only
 - c) Both a & b d) Neither a nor b
- Q.5 In injection molding machine, where does the granular material is loaded.
- a) Barrel b) Hopper
 - c) Mold d) Screw
- Q.6 Using Injection molding technique, we can process
- a) Thermoplastic Plastics
 - b) Thermoset Plastics
 - c) Both a & b
 - d) Neither a nor b

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Define Transducer.
- Q.8 Define molding.
- Q.9 Define Process.
- Q.10 Define Preform.
- Q.11 The short capacity of every material is based on PS. (T/F)

(2)

222252

- Q.12 Blow molding process produces mono axially oriented products. (T/F)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 How will you calculate the mount of material desired for a particular product in roto molding process.
- Q.14 Give the difference between perform and parison.
- Q.15 Define molding venting, give its significance.
- Q.16 What is the effect of melt temperature on Injection pressure and Injection speed of Injection moulding machine.
- Q.17 What is optimization of cycle time. What is its significance.
- Q.18 Write the four properties of PET material, which make it most suitable for injection stretch blow moulding process.
- Q.19 Write four advantages of uniform blow molded article.
- Q.20 Define direct mold clamping and indirect mold clamping.
- Q.21 With a neat sketch, write a note on extruder screw.
- Q.22 Write a note on nozzle used in Injection molding machine. Give its two types.
