

- Q.17 What are the steps to follow in case of a fire in an industry?
- Q.18 What are the basic safety precautions for working with explosive materials?
- Q.19 Define Boiling Liquid Expanding Vapor Explosion (BLEVE)
- Q.20 Describe any four types of personal protective equipment (PPE)
- Q.21 What precaution should be taken while working with inflammable gases?
- Q.22 Explain the concept of loss prevention in industries.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Discuss different safety measures required in a chemical industry.
- Q.24 Explain the classification of fire and how to control them.
- Q.25 What are the key safety precautions for handling toxic chemicals?

No. of Printed Pages : 4
Roll No.

5th Sem / Plastic Technology

Subject : Industrial Hazards and Safety

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Why is safety important in the chemical industry?
- a) To follow government rules
 - b) To protect workers and environment
 - c) To increase production
 - d) To save money
- Q.2 Which of the following is NOT a classification of hazards?
- a) Biological
 - b) Electrical
 - c) Psychological
 - d) Fire

Q.3 What is the purpose of loss prevention?

- a) To reduce risks and accidents
- b) To encourage unsafe practices
- c) To increase production cost
- d) None of the above

Q.4 What is an example of a toxic gas?

- a) Oxygen b) Nitrogen
- c) Carbon monoxide d) Water vapor

Q.5 Which gas is responsible for fire hazards?

- a) Hydrogen b) Oxygen
- c) Helium d) Carbon dioxide

Q.6 What is the primary purpose of fire extinguishers?

- a) To produce smoke
- b) To cool the surroundings
- c) To put out fires
- d) To create flames

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define the term 'hazard'.

Q.8 Name any two types of fire extinguishers.

Q.9 What does LFL and UFL stand for in flammability?

Q.10 Mention one precaution to take while handling chemicals.

Q.11 What is the role of PPE in industries.

Q.12 What should be done immediately after an accident?

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Define and classify hazards in an industry.

Q.14 Explain the significance of TLV in safety.

Q.15 What are the common symptoms of exposure to toxic chemicals.

Q.16 Explain how to store and transport hazardous chemicals safely.
