

Q.4 Which of the following is a type of Blow Moulding?

- a) Profile Extrusion
- b) Insert Moulding
- c) Stretch Blow Moulding
- d) Reaction Injection Moulding

Q.5 In Foam Moulding, which type uses high pressure?

- a) Low-Pressure foam
- b) High-Pressure foam
- c) Water-Assisted foam
- d) Gas-Assisted foam

Q.6 Multi-layer packaging is commonly used in :

- a) Electrical products    b) Furniture product
- c) Food packing            d) Wood polishing

### SECTION-B

**Note:** Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Give one example of paper plastic laminates.

Q.8 Water-Assisted Injection Moulding helps in making \_\_\_\_\_ parts hollow inside.

Q.9 Injection Stretch Blow Moulding is commonly used to make \_\_\_\_\_ bottles.

Q.10 Corrugated Sheets are manufactured using the \_\_\_\_\_ process.

Q.11 Give two advantages of multilayer packaging.

Q.12 Write complete name of RIM process.

### SECTION-C

**Note:** Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 What is Co-Injection Moulding? Explain briefly.

Q.14 What are the advantages of Gas-Assisted Injection Moulding?

Q.15 Explain Tie-Bar less Injection Moulding and its benefits.

Q.16 Differentiate between Extrusion Stretch Blow Moulding and Injection Stretch Blow Moulding.

Q.17 What are the advantages of Multi-Layer Blow Moulding?

Q.18 What is Profile Extrusion? List its applications.

Q.19 What are the advantages and disadvantages of Multi-Layer Blow Films?

Q.20 Explain Low-Pressure Foam Moulding.

Q.21 Define Plastic-Plastic Laminates and give two examples.

Q.22 Why is Multi-Layer Packaging useful in the food industry?
