3rd Sem / Textile Design
Subject : Fabric Manufacture - I

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 In tappet shedding, number of heald shafts that can be controlled are
- a) 6 to 8 b) 8 to 10
c) 10 to 15 d) 20 to 30
- Q.2 Knitted fabric is produced by the _____ of loops.
- a) Intermeshing b) Interlacement
c) Joining d) None
- Q.3 Tappet, dobby and jacquard are the types of _____ mechanism.
- a) Beat-up b) Picking
c) Shedding d) All

Q.4 The motion in which warp sheet is divided into two layers is known as

- a) Shedding b) Picking
- c) Beat-up d) Take-up

Q.5 Which of the following is not a primary motion

- a) Shedding b) Picking
- c) Take-up d) None

Q.6 Let-off motion is type of _____ motion.

- a) Primary b) Secondary
- c) Auxilliary d) None

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Shuttle is used for inserting _____ through the shed.

Q.8 Tell the function of crank arm

Q.9 Describe Weavers beam

Q.10 Dobby is mounted on the _____ of loom

Q.11 Write any one objective of warp stop motion.

Q.12 Define heald shaft

(2) 222534/182535
/122535/032533

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain the spring reversing motion

Q.14 Give the classification chart of loom

Q.15 Describe the importance of auxiliary motions.

Q.16 Illustrate the working of 5-wheel take-up motion with diagram

Q.17 Discuss the working principle of beat up motion.

Q.18 What are the limitations of handloom.

Q.19 Discuss the overpick motion.

Q.20 Discuss the timing diagram of loom

Q.21 Differentiate between primary and secondary weaving motions.

Q.22 List any five advantages of shuttlesless loom.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain construction and working principle of 7-wheel take up motion with diagram.

Q.24 Illustrate working principle of negative tappet shedding motion with diagram in detail.

Q.25 Explain construction and working principle of fast reed warp protector motion.
