

No. of Printed Pages : 4

222552

Roll No.

5th Sem / Textile Design

Subject : Fabric Manufacture - III

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Which picking system is replaced in modern looms?

- a) Shuttle picking b) Projectile
- c) Rapier d) Jet picking

Q.2 In a projectile loom, the weft is inserted by:

- a) Air b) Water
- c) Gripper projectile d) Flexible rapier

Q.3 Which mechanism is used to form tucked selvedge?

- a) Leno b) Catch cord
- c) Tucking-in motion d) Selvedge cutter

Q.4 What is the principle behind airjet weaving?

- a) Mechanical throw b) Fluid jet propulsion
- c) Magnetic repulsion d) Shuttle grip

- Q.5 Cross-leno selvedge improves:
- a) Fabric softness b) Fabric edge strength
 - c) Fabric color d) Fabric length
- Q.6 Which loom is best suited for filament yarns?
- a) Shuttle b) Rapier
 - c) Airjet d) Waterjet

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Gabler system uses only a single rapier to transfer weft.(True/False)
- Q.8 Projectile looms produce fabric with_____ selvedges.(Fused/tucked)
- Q.9 Define weft accumulator.
- Q.10 Tell the use of gripper in rapier looms.
- Q.11 Shuttle looms offer higher productivity than airjet looms.(True/False)
- Q.12 Leno Selvedges are created by_____ warp yarns. (tucking/crossing)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Explain the concept and use of weft accumulator.

(2)

222552

- Q.14 Differentiate between Gabler and dewas rapier system.
- Q.15 Define modern picking mechanisms with examples.
- Q.16 Describe how weft is inserted in a projectile loom.
- Q.17 What is the role of selvedge in fabric quality.
- Q.18 Explain the working of single phase and double phase rapier.
- Q.19 What is cross leno selvedge and how is it formed?
- Q.20 Discuss the problems commonly faced in airjet weaving.
- Q.21 What are the limitations of water jet weaving?
- Q.22 Differentiate between rigid and flexible rapier looms.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the complete working principle of rapier looms and compare single and double phase types.
- Q.24 What do you understand by selvedges. Discuss different types of selvedges used in conventional and unconventional looms.
- Q.25 Discuss the construction, working principle and limitations of water jet looms in detail with well-illustrated diagram.
