

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the tricot warp knitting machine cycle with neat and clean diagram in detail.
- Q.24 Explain knitting fabric defects causes and remedies in detail.
- Q.25 Explain the knitting cycle of compound and beard needle in detail with the help of neat diagram.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which of the following effects is produced by tuck stitches in knitted fabric?
- a) Increased fabric width and breathability
 - b) Reduced fabric thickness
 - c) Higher elasticity in the horizontal direction
 - d) Increased rigidity and reduced stretchability
- Q.2 Which of the following weft knit structures is produced by two sets of needles knitting alternately to create a double-layered fabric?
- a) Plain knit
 - b) Rib knit
 - c) Interlock knit
 - d) Purl knit
- Q.3 What does the cover factor or tightness factor in knitted fabrics indicate?
- a) The thickness of the yarn used
 - b) The number of loops per unit area

- c) The compactness of the knit structure
 - d) The elasticity of the fabric.
- Q.4 When loops are produced course wise then it is known as
- a) Warp knitting b) Weft knitting
 - c) Course knitting d) None
- Q.5 Cone or cheese are used as a supply package in _____ knitting.
- a) Warp b) Weft
 - c) Both 'a' & 'b' d) None
- Q.6 Technical face and back side of a loop are same in this type of structure
- a) Rib b) Plain
 - c) Interlock d) None

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Tricot and Raschel knitting machines are used to produce weft knitted fabrics. (True/False)
- Q.8 The _____ mechanism in tricot and Raschel warp knitting machines controls the movement of guide bars to create different stitch patterns.
- Q.9 Name any one type of weft knit structure.
- Q.10 Write any one use of warp knit fabric.

- Q.11 Define warp knitting.
- Q.12 _____ needle is also known as self-actuating needle.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Describe the basic characteristics of single jersey fabric.
- Q.14 Briefly explain about the latch needle with diagram.
- Q.15 What is the importance of cam in weft knitting process?
- Q.16 Write any five differences between warp and weft knitting.
- Q.17 What do you understand by robbing back in weft knitting? Explain.
- Q.18 Classify different types of warp knitting and explain their scope and uses.
- Q.19 What are the disadvantages of compound needle?
- Q.20 Discuss any five knitted fabric defects.
- Q.21 What is tightness factor? How it effects the knitting process?
- Q.22 Describe the working principle of Tricot and Raschel warp knitting machines with a simple diagram.
