

Q.21 Mention 4 properties of acid dyes.

Q.22 Write about Naphtholation.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain coaltar distillation process in manufacturing of dyes.

Q.24 What are Intermediates? Explain any two process.

Q.25 Discuss theories of colour.

2nd Sem / Textile Processing

Subject : Dyestuff Chemistry

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Direct dye is having affinity for

- a) Cotton b) Acetate
- c) Silk d) Polyester

Q.2 Acid dye is having affinity for

- a) Regenerated fibre b) Mineral fibre
c) Animal fibre d) Vegetable fibre

Q.3 ingrain dyes are

- a) Azoic colours b) Mineral colours
c) Oxidation colour d) All of these

- Q.4 Direct dyes are
- a) Anionic dyes b) Cationic dyes
- c) Non ionic dyes d) None of these

- Q.5 NaCl is used as
- a) Levelling agents b) Carriers
- c) Exhausting agents d) None of these

- Q.6 Wool can be dyed by
- a) Acid dye b) Metal complex dyes
- c) Mordant dyes d) All of these

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Write chemical representation for Direct dye.
- Q.8 Oxidation colour is an example of_____.
- Q.9 Tendering of black dyes cotton fabric is a defect that occurs in_____ dyed fabric.

(2)

222624

- Q.10 Write a dye that is having poor washing fastness property.
- Q.11 One example of water insoluble dye is_____
- Q.12 Azoic dye is an example of_____.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Differentiate between readymade and ingrain dyes. (Any 3)
- Q.14 Write about reactive dye.
- Q.15 Differentiate between dyes and colour.
- Q.16 Write Example of one dye belonging to each Nitro group and Azo group.
- Q.17 Write about Diazotisation.
- Q.18 What are intermediates? Name any 4
- Q.19 Why all colour can not be used as a dye?

(3)
