

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Discuss the principles, construction, and working of different drying machines used in textile processing.
- Q.24 Describe the various calendering processes with the help of a neat diagram.
- Q.25 Discuss in detail objects and methods of wash and wear finish.

3rd Sem / Textile Processing

Subject : Technology of Finishing - I

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 What is the priming purpose of textile finishing?
- a) Dyeing the fabric
 - b) Enhancing the fabric's appearance and performance
 - c) Increasing fabric strength
 - d) Improving fabric thickness
- Q.2 What is the main purpose of shrink-proofing in cotton fabrics?
- a) To enhance color
 - b) To prevent shrinking after washing
 - c) To increase strength
 - d) To reduce stiffness

(1)

222634

Q.3 What is the purpose of using anionic softeners on cotton?

- a) To increase strength
- b) To provide a soft finish.
- c) To enhance color
- d) To add weight

Q.4 Dimethylol urea is a _____ agent?

- a) Fuel b) Solvent
- c) Cross linking d) Fire retardant

Q.5 Which of the following are stiffening agents?

- a) Starch b) NaCl
- c) NaOH d) H₂O

Q.6 Zero-Zero finish is also called?

- a) Drying b) Heat setting
- c) Steaming d) Sanforization

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 What is the primary aim of textile finishing?

Q.8 Name one type of temporary finish applied to fabrics.

(2)

222634

Q.9 What is the purpose of the sanforising machine?

Q.10 Write the name of two softening agents.

Q.11 What type of finish is applied to fabrics for crease resistance?

Q.12 Write the name of two stiffening agents.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Describe the principle of friction calendering.

Q.14 What are the benefits of using softeners in textile finishing?

Q.15 How is the “zero-zero” finish achieved?

Q.16 What is the role of the stenter machine in textile processing?

Q.17 Differentiate between temporary and permanent finishes.

Q.18 Describe the process of embossing calendering.

Q.19 What are rot and mildew-proof finishes?

Q.20 Discuss various ingredients used in stiff finish?

Q.21 Write objectives of stiffening.

Q.22 Write a short note on the card wire-raising machine.
