

- Q.19 What is skewing in denim finishing?
- Q.20 State two advantages of enzyme washing over stone washing.
- Q.21 Mention two criteria for selecting pumice stones.
- Q.22 What is quick wash denim and why is it eco-friendly?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain in detail the major defects in denim fabric caused by faulty yarn, sizing, and weaving, and suggest preventive measures,
- Q.24 Explain the sanforset process and its role in denim pre-shrinking.
- Q.25 Explain the objectives of Denim wash and different types of denim washing processes with examples.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Indigo dye was historically extracted from:
- indigofera tinctoria
 - Isatis tinctoria
 - Polygonum tinctorium
 - All of the above
- Q.2 The unique faded effect in denim fabric is mainly due to:
- Deep penetration of dye into fibers
 - Surface ring-dyeing of warp yarns
 - Use of special finishing chemicals
 - High-temp

Q.3 The soluble form of indigo dye in alkaline solution is called:

- a) Oxidized indigo b) Leuco-indigo
- c) Indigo-salt d) Indigo paste

Q.4 Increasing the oxidation time between dips:

- a) Decreases color strength
- b) Converts leuco-indigo to indigo properly
- c) Reduces ring-dyeing
- d) Lower pH of the bath

Q.5 The pH of an indigo dye bath is usually maintained at:

- a) 4-6 b) 7-8
- c) 11-13 d) 14

Q.6 Which fiber blend is commonly used to make stretch denim?

- a) Cotton-polyester b) Cotton-hemp
- c) Cotton-spandex d) Cotton-wool

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Pre-shrinking of denim is done by _____ (Sanforsat process/ Skewing)

Q.8 Denim is generally woven in _____ (3/1, or 1/1) weave.

Q.9 The _____ (Gluko-alkali process/ Ammoniation) process uses liquid ammonia for denim finishing.

Q.10 Indigo dyes are usually applied in neutral pH. (True/False)

Q.11 The main purpose of enzyme washing in denim is to _____ (bleach the fabric/soften and fade the fabric)

Q.12 Pumice stones are selected based on _____ (Porosity and hardness/ color)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Why does denim fabric develop a faded look after repeated washing?

Q.14 Explain why indigo dyeing is carried out in alkaline condition.

Q.15 State two advantages of sheet dyeing over rope dyeing.

Q.16 Define twill weave and give one example.

Q.17 What is a broken twill and why is it important in denim production?

Q.18 Differentiate between warp-faced and weft-faced twills.
