Roll No.

3rd Sem / Textile Technology

Subject : Weaving Technology - 1

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Metallic comb that is fixed to the sley is called?

- a) Shuttle b) Reed
- c) Treadle d) Heald

Q.2 Fabric can be manufactured by.

- a) Weaving b) Non woven
- c) knitting d) All of the above

Q.3 Shedding in weaving is of _____ types.

- a) Two b) Three
- c) Four d) Five

Q.4 The mechanism of loom without which weaving is not possible?

- a) Primary b) Secondary
- c) Auxiliary d) all of above

Q.5 Heald is used for_____ motion.

- a) Shedding b) Picking
- c) beat up d) let off

Q.6 Which motion help in Release of warp sheet from the beam?

- a) Shedding b) Let off
- c) Take up d) Picking

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Name the primary motions of the loom.

Q.8 Take up motion in the loom is used for_____

Q.9 Let-off motion is classified as_____ and positive let-off.

Q.10 What is the powerloom?

Q.11 Name the different type of sheds used for weaving.

Q.12 Breast beam also known as the_____ rest.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Draw tappet shedding mechanism of a power loom and label the parts.

Q.14 Draw the flow chart for classifications of loom mechanisms.

Q.15 Draw the passage of material through Powerloom.

Q.16 Draw the over pick mechanism of loom and label and parts.

Q.17 Explain briefly and draw the various parts of seven wheel take up motion.

Q.18 What are the objectives of Take up motion of loom.

Q.19 Explain the terms PPI, Loom, Selvage and Weaving.

Q.20 Explain the sley eccentricity of loom.

Q.21 Draw the Negative let off motion of loom and label the parts.

Q.22 Discuss different types of Heald reversing motion.
